QUALITY-BUILT
WHEEL HUB ASSEMBLIES

ENGINEERED FOR SMOOTH PERFORMANCE

Forged steel construction and hardened bearing surfaces provide strength and durability, while protective seals and quality components support smooth, reliable operation.

QB PREMIUM SERIES

- **High-Carbon and Alloy Steel Forged Construction:** High-Carbon and alloy steel increases fatigue resistance and durability
- **100% ABS Sensor Testing:** Tested to ensure anti-lock braking function
- **High Grade Wheel Studs:** Increased strength and fatigue resistance
- **Induction Hardened Bearing Races:** Increased wear resistance and load-bearing strength
- **OE-Style Bearing Seals:** Prevents contamination of critical bearing elements
- **High Quality Grease:** Provides smooth operation under demanding conditions

QB BLACK SERIES

- **High-Carbon and Alloy Steel Forged Construction:** High-Carbon and alloy steel increases fatigue resistance and durability
- **100% ABS Sensor Testing:** Tested to ensure anti-lock braking function
- **Coated for Corrosion-Resistance:** Black oxide coated for superior rust and corrosion prevention
- **Induction Hardened Bearing Races:** Increased wear resistance and load-bearing strength
- **OE-Style Bearing Seals:** Prevents contamination of critical bearing elements
- **OE-Quality Grease:** Professional-grade grease application provides maximum heat dissipation and smooth operation under demanding conditions
