LOOP ERP

Bridging the Gap: How Loop ERP Connects Operations and Finance

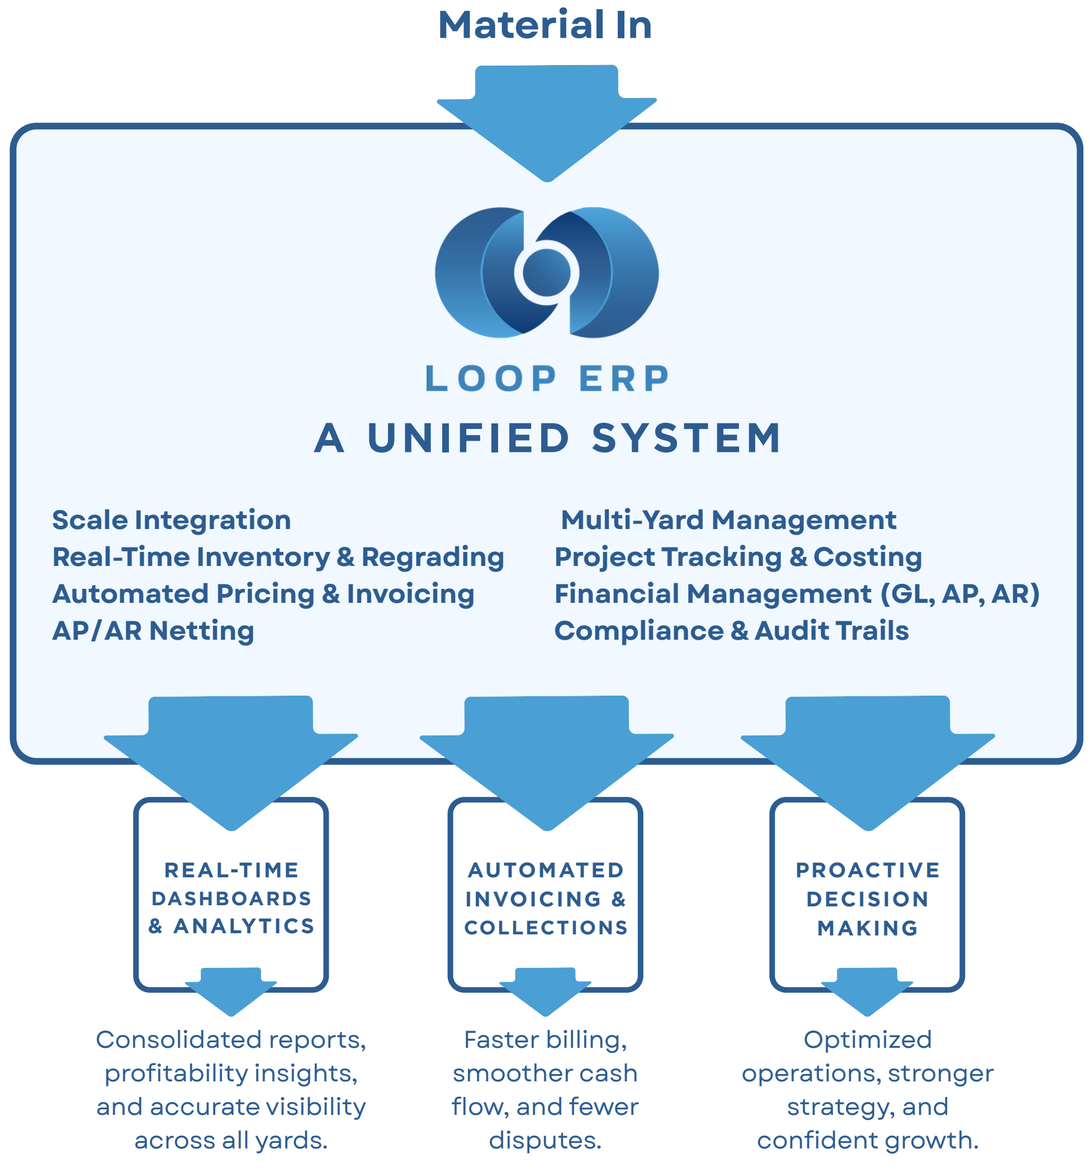

DISCONNECTED PROCESSES: THE MANUAL GRIND

Most scrap and recycling businesses run on a patchwork of legacy systems, spreadsheets, and manual workarounds. While it may get the job done, this disconnected maze leads to errors, delays, and missed opportunities.

SEAMLESS OPERATIONS: THE INTEGRATED SOLUTION

Loop ERP eliminates the maze of disconnected systems by unifying operations and finance in one platform. Instead of chasing spreadsheets and patchwork integrations, everything flows through a single source of truth.

Loop ERP: Built for the Scrap & Recycling Industry

Loop ERP isn't just another ERP.

It is purpose-built for scrap and recycling businesses that demand speed, visibility, and efficiency across their operations. Whether you're handling mixed loads, variable pricing, or compliance requirements, Loop ERP delivers a unified platform to manage it all–from purchasing and grading to inventory, logistics, billing, and financials.

No bolt-ons. No workarounds. Just one seamless system.

Why Loop ERP?

Designed for Scrap
Loop ERP understands the unique workflows of scrapyards and recycling operations–grading, downgrades, price disputes, image capture, audit trails, and more.

All-in-One Platform
Financials, procurement, sales, operations, and compliance all connected in one place, reducing manual work and boosting productivity.

End-to-End Traceability
Every image, grade, and price is tied to a record, ensuring full visibility from yard intake to final sale.

Efficiency at Every Turn
Stop juggling spreadsheets, disconnected apps, or legacy software. Loop ERP centralizes your workflows and eliminates guesswork.
