

Secure, versatile, advanced

IoT Control Terminal

Security gate or car wash access

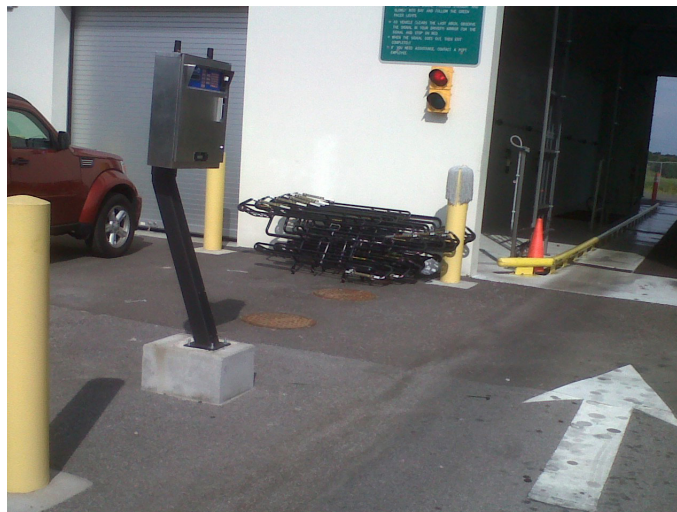

Advanced technology

The IoT CT Car Wash and Gate Control is a stand-alone interface with various operations such as car washes, vacuums, or remote electric entry gates. The CT can also be used in maintenance kiosks and transit bays. Authorization methods include HID badge or fob, mag stripe card, keypad entry, or combinations.

The CT sets the standard for operational Control Terminals with dependable, secure performance in extreme environments and weather systems.

KEY BENEFITS

- 100% Secure
- Real-time authorization with Fuel View software
- On-line messaging display screen and message dissemination with Fuel View software
- Broadcast or targeted messaging

Specifications

Memory	1MM+ Employees 1MM+ Vehicles 1MM+ Transactions
Power	115V; less than 2 Amps total current SBC battery backed and line conditioning
Communication Methods	Hard wire Cat5/6 - TCP/IP Cellular 3G / 4G - <i>optional data plans available direct from Ward</i> Wi-Fi - 802.11B/G/N
Temperature Range	-40°C to 60°C industrial rated components
Dimensions	
Weight	
Display	7 inch graphic display screen (800 x 480 pixels) Industrial temperature rated Readability in any light
Keypad	QWERTY
Certifications	     

* Dimensions may vary slightly.
