

## Grafheat Compact Base Heater

**SMART**  
**GREEN**  
**SAFE**  
**VERSATILE**

Manufactured with our patented and award-winning heating technology  
Inherently minimises heat loss, optimises heat transfer  
Automatic self-regulation and integral power limit  
Delivers the same power independent of applied voltage 100 – 240vac

This unique product has been developed by incorporating carefully tuned and optimised Graphene within a patented polymer composite. Our unique heating technology uses positive temperature coefficient (PTC) effect to control both the power and temperature of the heating devices. The applied solutions are extremely safe and economical to use for small and large industrial applications.

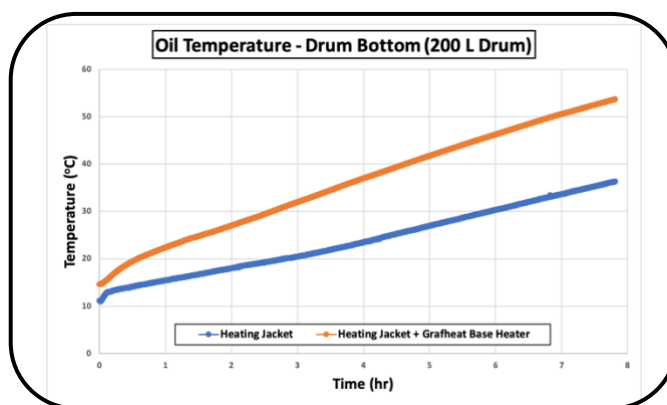

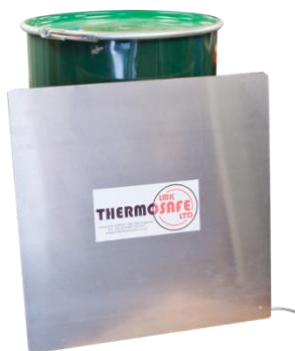

Our compact base heater (Model CBH-385U) is suitable for heating steel or plastic drums of any size up to 210 litres. The unique design and construction makes it extremely convenient and easily transportable to any location. Suitable for use on its own or in conjunction with other products such as our flexible heating jackets.

Grafheat compact heaters can be made in many sizes – call or email us for further details.

### PRODUCT SPECIFICATION

Voltage: 100-240v, 50/60Hz ac  
Self-regulating range: 50-60°C  
Dimensions: 385 x 385 x 20 mm  
Weight: 6 Kg  
Ingress Protection: IP54

**Grafheat** is also incorporated into our flexible cable heaters, base-board, IBC and pallet heaters for plastic or steel containers
