Ethernet LED Tower Light

QTG50(M)L/ QTG60(M)L/ QTG70(M)L-ETN

Thank you for purchasing Qlight's products. Please read this user manual carefully prior to installation and operation to ensure safe and correct use.

⚠ Precautions for Safety

Failure to follow the instructions below may cause a loss of life or serious physical injury.

1. During wiring or maintenance, please completely turn off the power of the product. (Failure to follow this may lead to an electric shock.)
2. Do not install the product in locations that subjects it to excessive dust or water other than the conditions designated by the IP protection ratings indicated for each product. (Failure to follow these instructions may cause a fire to the product, electric shock, physical injury, malfunction or damage to the product.)
3. Do not alter or repair this product. If maintenance or repair service is required, please contact your local Qlight contact point. (Failure to follow these instructions may lead to fire, electric shock, or product damage.)
4. Please apply the correct voltage to the product. (Failure to follow these instructions may lead to fire, electric shock, or product damage.)
5. When the product is applied to a condition that may impact lives or property, please make sure to have a double safety device. (Failure to follow this may cause damage to property, fire, electric shock and loss of life.)

⚠ Precautions for Correct Use

Failure to follow the proper instructions may cause damage to property, the product, or malfunction of the product that would void the warranty.

1. Please remove any objects that can interrupt ventilation around the product.
2. Please turn off the power of the product immediately if it fails to operate properly.
3. Carefully wire the product according to each product's specification.
4. Please be careful in preventing chemicals such as thinner, benzene, etc. in contact with the surface of the product.
5. Do not apply excessive force/impact to the product.
6. Failure to follow any of the instructions above may cause malfunction or damage to the product, fire, and electric shock.

Wiring Instructions

- Connect RJ45 connector that is connected to UTP cable to Ethernet port of a PC or a router.
- External power line - UL1015 AWG18(0.75sq) x 2C 400mm
- For AC type, power cable is equipped with the product.
- UTP Cable : Category 5 cable

- Connect RJ45 connector that is connected to UTP cable to Ethernet port of a PC or a router.
- External power line - UL1015 AWG18(0.75sq) x 2C 400mm
- External signal line - UL1007 AWG22(0.3sq) 400mm
- For AC type, power cable is equipped with the product.
- UTP Cable : Category 5 cable

Applying the Ethernet Device

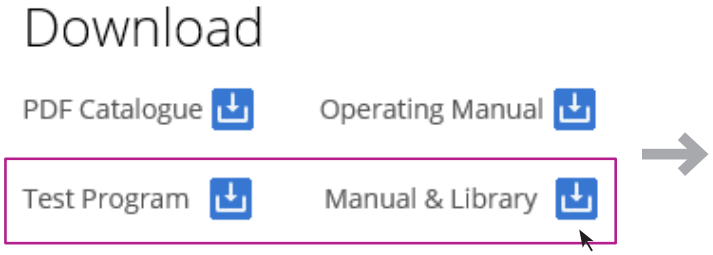

1. Please activate default PC network only. Please run Windows CMD(Command line) of PC over the same network in order to confirm network information where the Ethernet product will be connected.
   Example) Windows 7 : Start(Run)->CMD->ipconfig /all
   Windows 10 : Start menu-> Click right mouse button->CMD->ipconfig /all
   - Please refer to below network information when the Ethernet product's network environment is configured.

```
Ethernet adapter Local Area Connection:

        Connection-specific DNS Suffix  . :
        IP Address. . . . . . . . . . . . : 192.168.10.101
        Subnet Mask . . . . . . . . . . . : 255.255.255.0
        Default Gateway . . . . . . . . . : 192.168.10.1
```

Please refer to the manual posted on the website for instructions on how to use the product.

2. Because the ETN tower light is connected to a hub with the PC that is same as the picture on the front page, ETN tower light and the PC are now connected with the same network.
3. Please download the product manual, library file and test program from Qlight website(www.qlight.com) or blog.qlight.com

1.Dev. ETN Program Sample
Program Sample needed when developing (x32bit/x64bit compatibility)

2.How to use
Instructions of how to use the product and library file

4. When you unzip the file, there will be a file with the same name below. The instructions are listed inside the file.
5. When you unzip "ETN TEST PROGRAM.zip" file, following folders are created.

1.ETN Test Program
A program for setting IP before testing the ETN device

2.IP Set Program
A program for setting testing the ETN device

Applying the Ethernet Device

6. Run the “Mac_Setting.exe” program that is inside the IP Set Program Folder .

① When the program is running such as the right figure, click the “Mac Find” button in the “Find Mac Address / Select” section

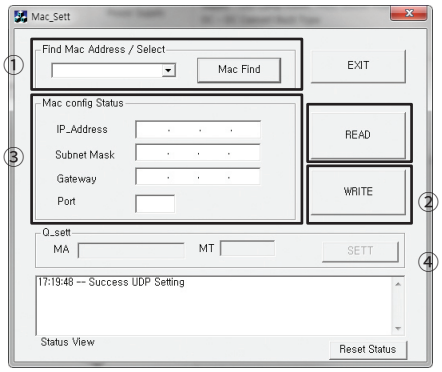

- MAC Address of the connected device appears when you click the Device List combo box. (If the Mac Addr does not appear, make sure that the connection status or the power supply is functional and then retry.)

② Select the MAC Addr of the device you want to change, and then click on the “Read” button.

③ Check the information and settings from the “Mac config status”

④ Set the value of users network information identified in the previous chapter (subnet mask, gateway) in each text box, and set a different IP_Addr than your PC
Apply the settings by pressing the Write button

- The port is set to “20000“by default and the port number can be changed if necessary
- Reconnect After Disconnecting the power from the tower light.

7. ETN Test Program Files folder includes the followings.

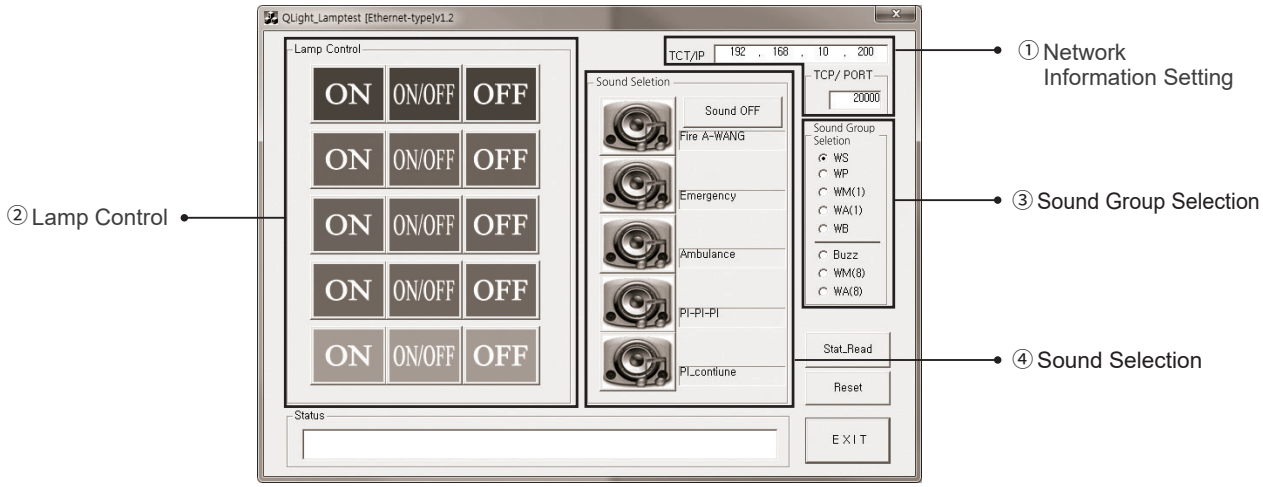

QLight_Lamptest_TCP.exe
Test Program

QTvc_dll.dll
Library required for the test program

8. Run the “QLight_Lamptest_TCP” program.

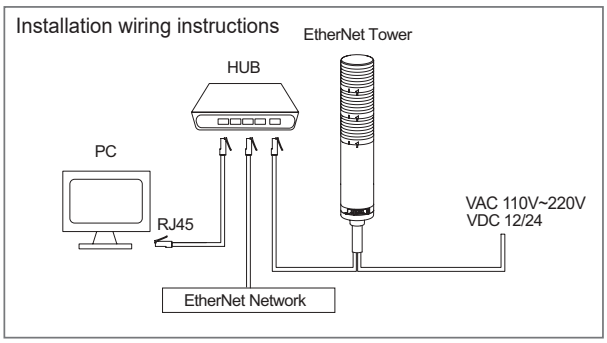

Article	Detailed specification
① Network information setting	- Input port on TCP/PORT and IP address on TCP/IP that set on Ethernet tower lights
② Lamp control	- ON : Click the button Lamp ON - ON/OFF : Click the button Lamp Flash - OFF : Click the button Lamp OFF
③ Sound group selection	- WS : 5 warning sounds(mono) - WP : 5 special warning sounds(mono) - WM(1) : 5 Melodies(mono) - WA(1) : 5 alarms(mono) - WB : Software Buzzer 5 sounds(speaker type) - Buzzer : 5 Buzzer sounds
④ Sound selection	- Select 5 sounds based on model which is fixed on Ordering Specifications

• User can select appropriate sound pattern by referring Ordering Specifications. There’re WS, WM, and WA sound patterns and user can choose the option when placing order.

• Fill TCP/IP and TCP/PORT (①Network Information Setting) with IP address and port that has been setted in ethernet tower light.
• When click LAMP ON, correspond lamp turns on.
• When click LAMP OFF, correspond lamp turns off.
• Please choose appropriate sound pattern group by referring ③ Sound Group Selection area.
• You can choose sound pattern by referring ④ Sound Selection.
• Tower lamp plays sound when SOUND button is pressed.
• Tower lamp stops sound when SOUND OFF button is pressed.

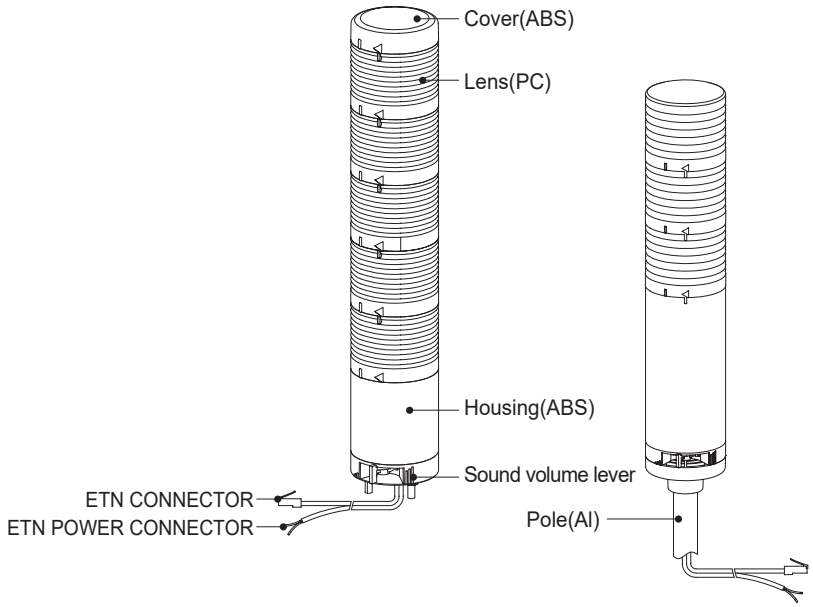

Product Installation

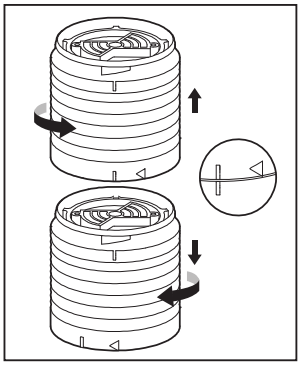

■ Test Ethernet LED Tower Light

1. Please connect LAN cable of the tower light to the router so that the tower light can access Ethernet network by referring left diagram.
2. Please be sure that the power supply shall meet the product specification accordingly.

Parts Definition

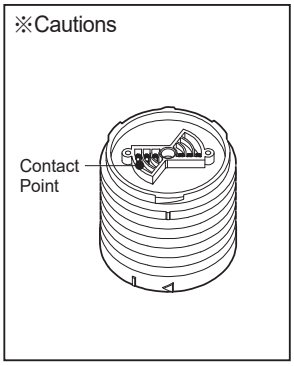

How to Change Lens Kit

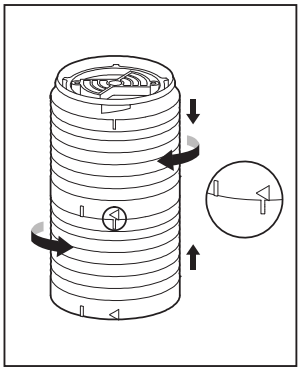

• Disassembling lens kits

① Twist the upper lens kit in a counter-wise direction so the "I" mark from both kits align.

② Disassemble by removing the upper lens kit from the lower one.

Lens modules are connected through cone-shaped contact point. In case the contact point is damaged, it may cause a contact failure.

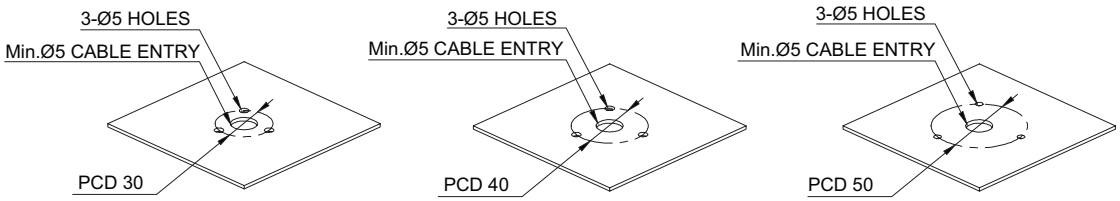

• Assembling lens kits

① Put the two lens kits together by aligning the upper lens' "I" mark and the lower lens' "I" mark together.

② Lock the two kits by twisting the upper lens kit in a counter-wise direction so the upper lens' "◁" mark aligns with the lower lens' "I" mark.

Mounting Hole Specifications

① Machine holes on the mounting surface referring to the diagram below.

QTG50ML-ETN-BZ QTG60ML-ETN-BZ QTG70ML-ETN-BZ

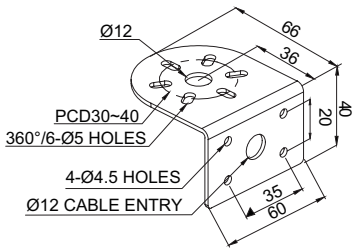

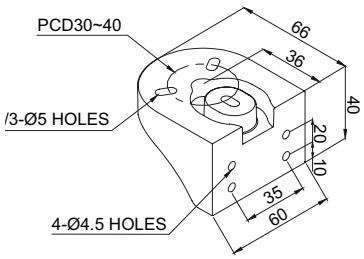

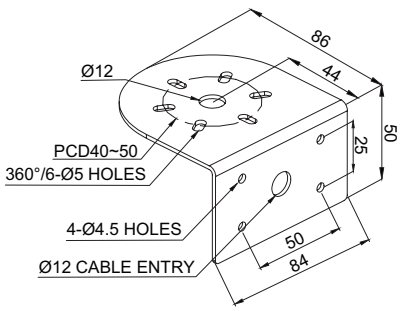

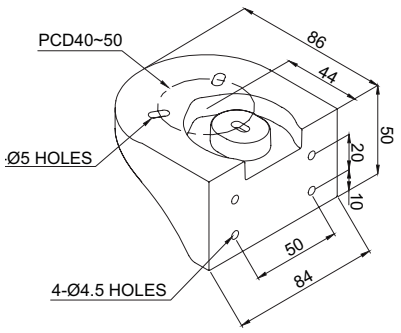

② Remove the flange nuts from bolts and place the product through the mounting surface holes.

③ Fasten the flange nuts on the opposite side of the mounting surface until the product is tightened securely.

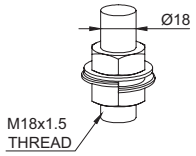

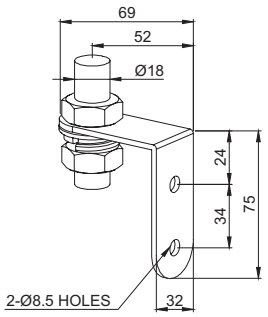

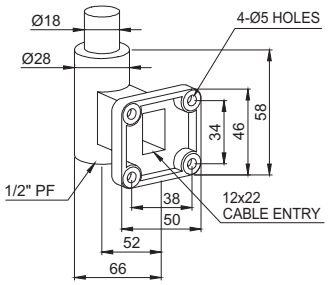

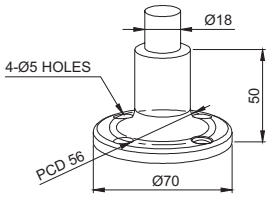

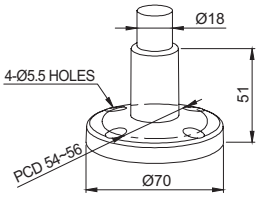

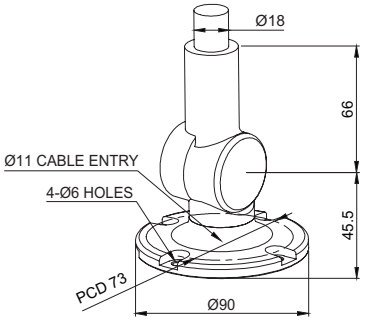

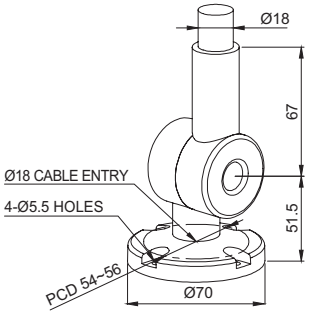

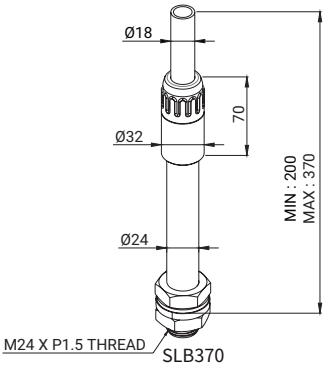

Mounting Accessories (Sold Separately)

• Please refer to the dimensions below for installati on of mounting brackets

Product installation direction

■ **Install the product in accordance with the manual. Otherwise rainwater or moisture may penetrate into the product.**

· BEACON/SIGNALING LIGHT

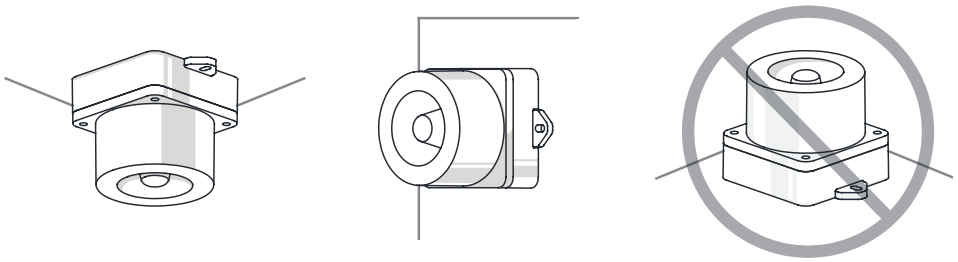

※ For products with a protection rating of less than IPX4, please install it vertically.

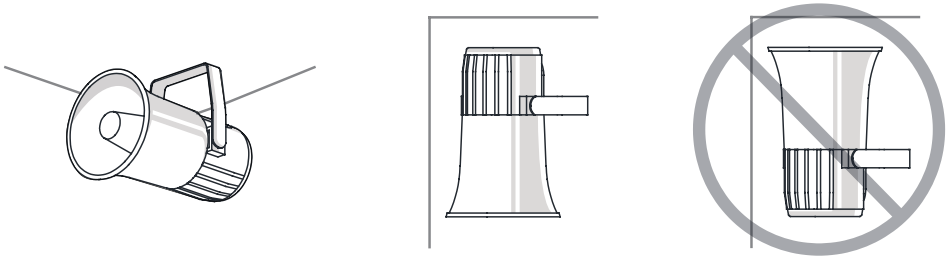

Power cord inlet part shall not be facing the sky.

· ELECTRONIC SOUNDER/SIGNAL HORN

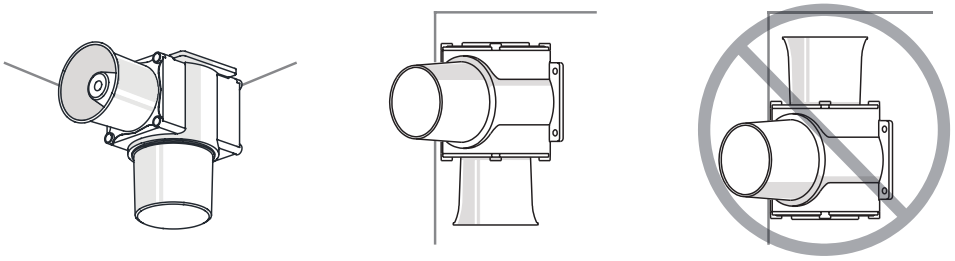

Sounder part shall not be facing the sky.

· HEAVY-DUTY & EXPLOSION PROOF SIGNALINGS

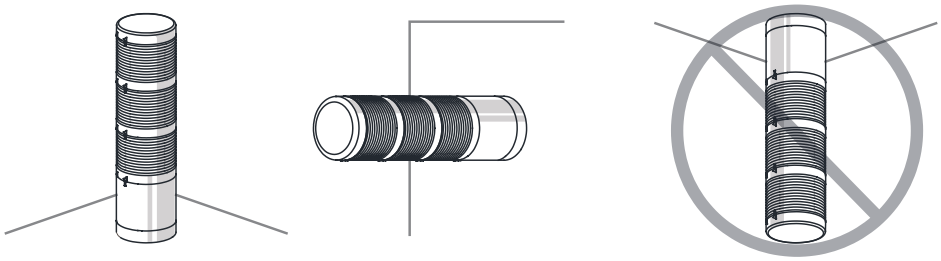

Sounder part shall not be facing the sky.

· SIGNAL TOWER LIGHTS

※ For products with a protection rating of less than IPX4, please install it vertically.

Power cord inlet part shall not be facing the sky.
