

Congrats on getting your new NK68 Pro! We're sure you're going to love it.

When designing this model, we poured our hearts into every little detail—making it comfy, stylish, and packed with tech to be fast and super precise.

Inside, you'll see a quick tour of all the cool features and tricks your NK68 Pro can do.

We're proud of this keyboard, and we hope you'll be just as excited about it as we are. Thank you for choosing us!

Roller, INS or ESC?

Yes! We've made this keyboard not only affordable, but also a joy to type on—both in sound and feel. That satisfying thocky sound is now part of NK68 Pro! We started with the legendary g3ms Sapphire v2 switches and refined the keyboard's structure. The result? Sound and tactile feel on par with premium boards!

Hot Swap & Customization

Hot swap for every switch and south-facing LEDs. Fully compatible with all keycaps. Customize it your way.

Wireless Mode (2.4G & BT)

Inside NK68 Pro are two 4,000 mAh batteries (or 8,000 mAh total). They hold a charge a long time. A very long time. Tested and proven!

Flex Cuts in PCB & Plate

More flex, more give, more typing joy. The plate is polycarbonate while the PCB is fiberglass.

Gasket Mount Structure

Perfect flex right out of the box. Want a different feel? Switch to Top Mount—the box includes everything you need for the swap, even a prying tool to make opening the case a breeze :)

Double Sound Dampening

We've added high-quality poron foam inside the case and between the PCB and plate, . The keystroke sound is clean and pleasant—no echo, no unwanted noise!

Signature CSA Profile Keycaps

High-quality, made with durable double-shot molding. A comfy profile with bright backlighting on every legend and a pleasantly textured top surface.

g3ms Aquamarine Switches

That beloved premium thocky sound. Built to last over 80 million presses with zero double-click issues. Guaranteed!

Extras in the Box

Along with the keyboard, you get an extended accessory kit—extra screws, spare gaskets, a puller, a prying tool, and keycaps. Everything you might need. The 2.4G receiver is tucked under the top flip-out foot :3

Where is Print Screen?

Everything's included! We've added extra keycaps so you can customize the 4-key block to your liking. Need PrtScr or Pause? Simply swap the keycaps and remap the keys in the Nubi web software.

Actuation Point Highlighted in Real Time

Not just an indicator—a multifunctional LED strip. It shows keypress depth, switch actuation point, active mode, and other keyboard settings.

Snap Tap? Yes!

Turn on Snap Tap with one move. No software. Perfect for esports and shooters.
