

DR. JED MACOSKO

Ph.D.

Dr. Henry F. Schaefer III is a world-renowned computational chemist and University of Georgia professor whose distinguished scientific career is matched by decades of thoughtful engagement with the relationship between science and Christian faith.

AREAS OF EXPERTISE

Biophysics

HOBBIES

Creating Bible devotionals

FUN FACT

I lived in Uzbekistan

LIFE VERSE

For to me, to live is Christ and to die is gain. ***Phillippians 1:21***

PROFESSIONAL BIO

Dr. Jed Macosko is a Professor of Physics at Wake Forest University whose work brings together physics, biology, and technology to explore some of the remarkable machinery of life. A graduate of MIT and UC Berkeley, his research in biophysics focuses on molecular machines, cell mechanics, cancer, microscopy, and innovative approaches to drug discovery.

Throughout his career, Dr. Macosko has combined scientific research with a passion for teaching and communicating complex ideas in engaging and accessible ways. His interdisciplinary perspective allows him to speak thoughtfully about scientific discovery, the complexity of living systems, education, and the relationship between science and the bigger questions of meaning, purpose, and faith.

UNIVERSITIES ATTENDED

University of California, Berkley
Ph.D. Biophysical Chemistry

Massachusetts Institute of Technology
B.S. Chemistry

SOME SPEAKING TOPICS

- ***Science and Faith***
