DELIVERXD HEALTHCARE

Patient Treatment Guide

A quick reference from DeliveRxd Healthcare

About your compounded medication

Your provider has prescribed a compounded GLP-1 medication, personalized to your needs. It's prepared with FDA-approved active ingredients by a licensed pharmacy the compounded product itself is not FDA-approved, and is made specifically for you.

Using your medication

- Use exactly as directed never adjust your dose on your own
- Store as instructed on your label (many require refrigeration)
- Never share your medication or injection supplies

What to expect

Response varies person to person. Some notice appetite changes within weeks; for others it takes longer. Your provider will adjust your plan as you go.

Common side effects

- Nausea or stomach upset, especially with dose increases
- Injection-site redness or mild swelling
- Fatigue or headache

Most side effects are mild and improve over time.

When to seek urgent care

- Severe or persistent abdominal pain
- Signs of severe allergic reaction: trouble breathing, facial/throat swelling, widespread rash
- Signs of low blood sugar (if also on other diabetes medication): shakiness, confusion, sweating

Individual results may vary. This handout is educational and does not replace guidance from your prescribing provider. Questions? Contact your care team.
