

ARCH INVESTMENT RESEARCH

Sharper diligence, shared across the firm, kept for the life of the investment

Investment Research was built for private market diligence. It extracts deal terms traceable to source documents, surfaces information to review, so you can evaluate every opportunity against your own criteria.

Relevant teams see every deal from intake to commitment to keep up to date on the status of the opportunity.

At close, your diligence and rationale stay with the investment for its full life so advisors and operations teams can see key terms, like fees.

FOCUS ON THE ANALYSES THAT MATTER

Extracts terms from offering materials, fully auditable to source documents and surfaces information for review

Analyze opportunities against your own investment criteria

Deep Research adds external, web-based context

DILIGENCE CONTEXT STAYS WITH THE INVESTMENT

Diligence, rationale, and documents stay tied to the investment after close

Passed and rejected deals are kept with full context

RELEVANT TEAMS SEE THE SAME DEAL

Operations teams see when opportunities are nearing commitment and can track allocation records across investors

Advisors and Operations teams gain visibility into investment terms and fees in the platform they already use to monitor investments

50%

less diligence time per deal*

“Investment Research helps my team walk into introductory calls with better questions for fund managers by front-loading the discovery process.”

– Mike McLelland
Managing Director, Investments at Clearstead

Why not a generic LLM?

A general AI tool sees one document, for one person, for one session. Investment Research sees your whole pipeline, shares it with relevant teams, and keeps the reasoning for the life of the investment.
