

88%

Of the fakes we catch, eyes
would've missed

75% of fakes clear UV light scans

A barcode reads the fake details perfectly. It
never asks if they're real.

The ID clears. The badge gets issued. The log
inherits the error. So does the audit trail.

Not with Veridocs.

UNFOLD TO KNOW MORE.

One trusted identity. Every site, every shift.

Be certain who walked in. The
identity layer under 95% of the Las
Vegas Strip.

The one layer that isn't in the stack
you sell.

- Authenticate the physical ID at every
access point.
- Secure the log, audit, and everything that
depends on it.

BOOTH 1357

10 seconds

That's all security gets to
check an ID.
Every site. Every shift.

Authenticate the physical ID and verify the
person at the moment of decision. So one bad
ID never impacts the decisions that follow.

One trusted identity under 10 seconds

▶ 01 Capture

Multi spectral 3 light scan
at the counter

▶ 02 Authenticate

Checked against
commercial fraud libraries

▶ 03 Verify the person

Facial comparison and
liveness check

▶ 04 Watchlist screening

Against frequently
updated govt lists

▶ 05 Decision

One clear outcome for
staff: Pass, flag, or deny

One platform

□ Evolution

Browser based workflow UI for all modules
