Change your password

Update your password from your account profile, or request recovery when you cannot sign in.

1 Open the password screen

After signing in, select the **profile icon** at the top right, then select **Password**.

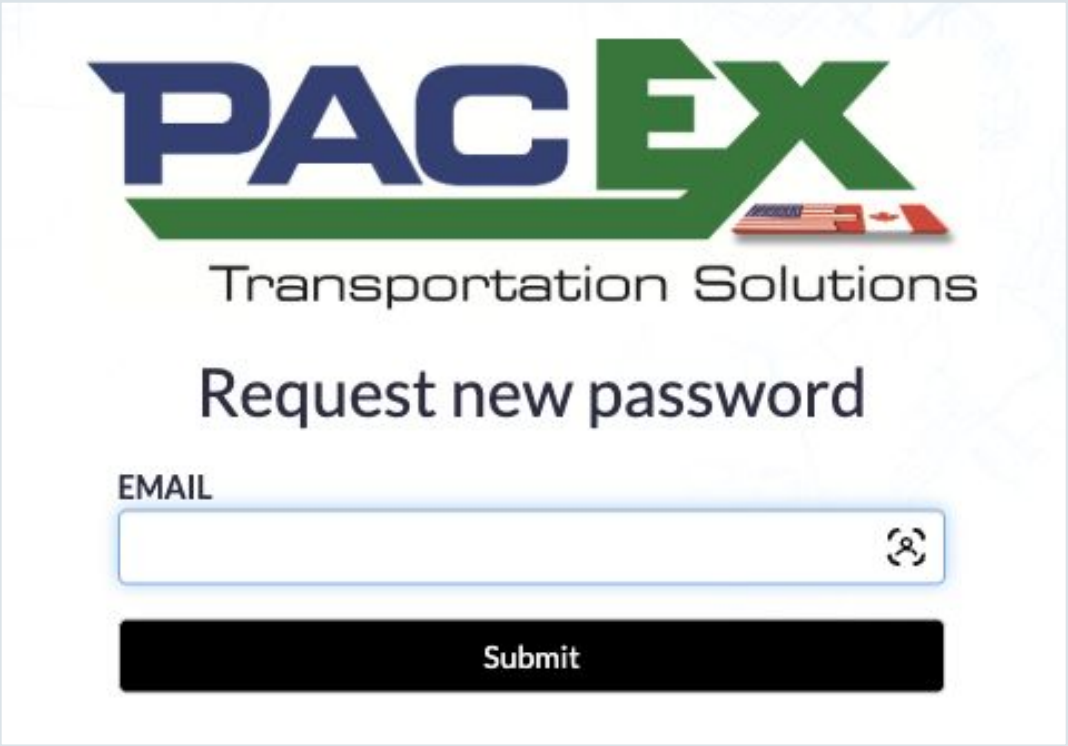

2 Enter and confirm the new password

Enter your **Current password**, then enter the new password twice. Follow any password requirements shown and select **Change password**.

Keep your password private. Do not send it to PACEX by email.

3 Request password recovery

On the login page, select **Forgot password**. Enter the email address associated with your account and select **Submit**.

Follow the instructions sent to your email address. Check your junk folder if nothing arrives. If you no longer have access to that email address, contact PACEX rather than creating another account.

Need help? Call **1-888-837-2239**.
