### COMPOSITE CHARACTERISTICS

|                                   |       |
|-----------------------------------|-------|
| Average Maturity (yrs.)           | 10.31 |
| Modified Duration to Worst (yrs.) | 6.62  |
| Current Yield (%)                 | 4.63  |
| Average Credit                    | AA-   |
| Average Coupon (%)                | 4.22  |
| Yield to Worst (%)                | 5.47  |
| Yield to Maturity (%)             | 5.47  |

### MODIFIED DURATION TO WORST DISTRIBUTION (YEARS)

Duration is a measurement of the price sensitivity of a fixed-income investment to changes in interest rates.

### CREDIT RATING BREAKDOWN

\* Credit calculation combines Moody's and S&P ratings. If both exist, they're equally weighted and averaged; if only one exists, that rating is used. All ratings are shown on the S&P scale. Treasuries are included and treated as AA+.

### SUPER SECTOR BREAKDOWN

| Sector     | Weight (%) |
|------------|------------|
| Government | 46.62      |
| Municipal  | 29.06      |
| Corporate  | 22.38      |
| Agency     | 1.22       |
| Cash       | 0.72       |

### QUARTERLY RETURNS (Past four quarters)

|                                         | 4Q2025 | 1Q2026 | 2Q2026 | 3Q2026 | YTD   |
|-----------------------------------------|--------|--------|--------|--------|-------|
| Composite Pure Gross Return (%)*        | 0.95   | 0.29   | 0.67   | -3.87  | -2.94 |
| Composite Net Return (1.500% Model Fee) | 0.57   | -0.09  | 0.30   | -4.23  | -4.03 |
| Composite Benchmark Return (%)          | 0.90   | -0.20  | 0.70   | -3.32  | -2.85 |
| Number of Accounts                      | 288    | 280    | 268    | 254    | -     |
| Composite Market Value (\$M)            | 412.96 | 297.60 | 288.51 | 273.12 | -     |
| Total Firm Assets (\$B)                 | 3.22   | 2.76   | 2.85   | 2.58   | -     |
| Firm Assets (%)                         | 12.84  | 10.77  | 10.12  | 10.58  | -     |

\* Pure gross returns are presented as supplemental information as the results for bundled fee accounts are not reduced by transaction costs.

<sup>1</sup> Partial period Jan 2026 to Sep 2026

### Disclosures for Composite: Total Return Gov/Credit

Cumberland Advisors ("Cumberland") is an Investment Advisor established in 1973 and registered with the United States Securities and Exchange Commission. Cumberland manages a variety of equity, taxable and tax-free fixed income, and balanced assets primarily for U.S. citizens in separately managed accounts.

Cumberland Advisors claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Cumberland Advisors has been independently verified for the period 01/01/2012 to 12/31/2025. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Total Return Gov/Credit Composite includes all fee-paying, fully discretionary portfolios managed to the Total Return Gov/Credit strategy. The strategy seeks to design customized taxable fixed income portfolios for individuals and institutions. Portfolios are actively managed by strategically taking advantage of undervalued opportunities and purchasing high quality bonds. Portfolios may include taxable issues such as, but not limited to, Treasury and agency notes, bonds, and bills. In addition to taxable issues, portfolios may also invest in tax-free municipal bonds when advantageous. The strategy has the flexibility to tactically extend or reduce duration when compelling opportunities are presented in the

market. Portfolios that restrict maturities to less than 15 years or restrict duration to 6 years or less are excluded from the composite. Additionally, portfolios that impose any restriction on yield, price, or credit quality are excluded. Investing in securities involves a risk of loss that the investor should be prepared to bear. Taxable fixed income securities have the following known risks: credit, default, liquidity and interest rate. Credit risk involves the creditworthiness of the issuer affecting their ability to pay their debt obligations and take on additional debt at favorable rates. Default risk increases with a management failure, inadequate revenue streams to cover the debt service, or fraud. Liquidity risk impacts the ability to move out of a security while actively rebalancing portfolio durations to meet strategy adjustments. Interest rate risk comes from rising inflation eroding the real value of a fixed-income security's principal and the buying power of the interest payments. Prepayment risk (mortgage-backed securities, if applicable) is the possibility that the mortgages underlying a security are repaid faster or more slowly than expected. This can contract or extend investment average life. The minimum portfolio value for inclusion in the composite is \$250,000. The composite was created 12/2017.

The benchmark is the Bloomberg U.S. Gov/Credit Index. The index includes investment grade, U.S. dollar-denominated, fixed-rate treasuries, government-related and corporate securities.

Performance is expressed in U.S. dollars. Past performance is no guarantee of future results. Performance results are total returns and include the reinvestment of all income, including dividends. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The firm's list of composite descriptions is available upon request.

Equal-weighted standard deviation is a measure of the dispersion of the gross-of-fees returns for accounts included in the composite for the full period. Equal-weighted standard deviation is not presented for periods when the composite

contained five or fewer accounts for the entire period as it is not statistically meaningful. The three-year annualized standard deviation is a measure of the variability of the gross-of-fees composite returns and benchmark returns over time.

Composite returns represent the asset-weighted average of the performance of all accounts included in the composite. Accounts in the composite may pay a wrap/bundled fee based on a percentage of assets under management. Wrap/bundled fees vary on asset size and are negotiated by the sponsor and generally these fees range from 100 to 300 basis points. Bundled-fee schedules are provided by independent wrap/platform sponsors and are available upon request from the respective wrap sponsor. Alternatively, accounts in the composite may have their fees unbundled. For unbundled fee accounts, trading costs are incurred and deducted on a per transaction basis.

Gross-of-fees returns have been reduced by transaction costs incurred for unbundled fee accounts but have not been reduced by transaction costs that are included within bundled fees and are, therefore, considered "pure" gross and are presented as supplemental information only. Net-of-fees returns are presented net of a model wrap/bundled fee (1.5%). Model fees are deducted at a rate of 1/12th per month from the gross-of-fees composite returns. The composite fee schedule for accounts that are not operating under a bundled-fee arrangement is as follows: Fixed Income Portfolios Maximum Annual Fee Charged – 52.5 basis points (0.525%). Fees are negotiable and not all accounts included in the composite are charged the same rate.
