Vacant House Visit Log

For the weeks an estate house sits empty. Set up once, then log every visit.

An empty house tells people it's empty. The answer is routine: someone walks the house on a schedule, checks the same things every time, and writes down what they find. If a question comes up later (a leak, a break-in, an insurance claim), this log shows what was checked, and when. **Keep the receipts with it.** Fill in pages 1 and 2 once; use a visit page every time.

This log is for the visits. What's inside the house goes on the Room-by-Room Contents Worksheet. The house itself, its structure, systems and condition, goes on the House Condition Worksheet.
