16:00-17:00 Regulatory Forum: AI, Oversight and Evolving Supervisory Expectations

As AI moves from experimentation into day-to-day financial markets activity, regulators are considering both how firms use these tools and how supervisory authorities can use data and analytics more effectively themselves. This session brings together senior voices from across the U.S. regulatory landscape to discuss how AI is shaping market oversight, examination priorities and expectations for firms. The discussion will explore where AI may support surveillance and analysis, what risks regulators are watching most closely, and what firms should be prepared to evidence as adoption increases.

- **Michael J. Otten**, Senior Vice President, Head of Member Oversight, NFA
- **John Martino**, Vice President, Examinations, FINRA
- **Ian McGinley**, Partner, Sidley
- **Tejal Shah**, Partner, Cooley
- **Andrew Waters**, Head of Partnerships and Regulatory Affairs, TradingHub (Moderator)
