Pump Pontoon

Multi-drum float

The **Williams Pump Pontoon** is a durable multi-drum float designed to support effluent pumps and stirrers on ponds or concrete tanks. Now featuring a **quick-release system**, removing the pump is simple - just undo 4 coach bolts and lift the pump straight off, with no need to disconnect the outlet pipe. Using a pontoon keeps your pump floating at a consistent depth, ensuring reliable performance from the surface of the pond. The standard set-up suits all effluent pumps from **5hp to 30hp**. Pontoons are secured to the pond or tank edge with either a **boom** or a **guide system**. A guide or legs can be added to prevent the stirrer from hitting the bottom of the tank.

- Durable multi-drum float design
- Ideal for positioning effluent pumps and stirrers on ponds and tanks
- Pumps from a consistent set depth, floating on the pond surface
- Choice of 4-drum or 6-drum configurations
- Boom includes a 76mm O.D. effluent pipe and a 33mm O.D. service pipe for electrical cables
- Compatible with all effluent pumps from 5hp to 30hp
- Boom lengths available from 3 to 10 metres
- **NZ designed and manufactured**
- **Simple, built to last**
- **12 month manufacturer guarantee**

Williams

Effluent Solutions

"Our Williams 6 Drum Pontoon has made irrigating from the pond simple and reliable. It's sturdy, simple to use, and performs exactly as we hoped. Irrigating directly from the pond is now hassle-free. The addition of autogreasers means less hands-on maintenance and a safer system overall - a smart upgrade for our farm."
