Pond Stirrer

Tractor Driven

Our **Williams Pond Stirrer** is a tractor PTO-driven, 3-point mounted pond stirrer designed to mix effluent before emptying. Its **multi-directional agitator** (not a propeller) helps **prevent bank scouring** and **reduces tangling** with debris. Built tough for farm use, it features a **40mm 4340-grade centre shaft**. The stirrer saves time when loading and spreading, and ensures a consistent effluent mix for better application.

- Fully sealed taper roller bearings
- Oil lubricated bearings
- Robust, heavy-duty drive shaft
- Swing-out road wheels for easy transport and operation
- Adjustable, heavy-duty ratchet top-link
- Proven sealing system — built the same way for over 30 years
- 6.5 metres long (custom lengths available)
- 600mm x 300mm multi-directional agitator (not a propeller)
- 4 heavy-duty neoprene seals on a stainless steel shaft
- Optional safety clutch available
- **NZ designed and manufactured**
- **Simple, built to last**
- **12 month manufacturer guarantee**

Williams

Effluent Solutions

"I purchased a Williams 6.5m tractor PTO-driven pond stirrer, and it has been fantastic for keeping my effluent pond properly mixed while pumping. With a large 40m x 40m pond to manage, I needed equipment that could handle the job efficiently and reliably—and the Williams stirrer delivers. It's simple to operate, does a great job of breaking up solids, and ensures a consistent mix throughout the pond. I'm really pleased with its performance and would recommend it to anyone looking for a robust and effective stirring solution."

-Pete McRae
