

LEGAL ACUMEN AT MISSION SPEED.

Eudia puts an AI legal team behind every attorney, grounded in statute, regulations, rules, the Manual for Courts-Martial, and governing case law.

01

ASSISTANT

RESEARCH • EXECUTE

Ask questions of your own data, the web, legal authority and precedent, and .mil or .gov sources. Review and draft in the same conversation, with **robust citations pinned to the exact passage** each answer was pulled from.

02

PROJECTS

COLLABORATE AT SCALE

Upload **tens of thousands of documents** into a single project. Query across all of it at once, and run agents against the entire corpus, not one file at a time.

03

AGENTS

FORCE MULTIPLIERS

Purpose-built agents for the work that eats your week: **redact PII, translate, compare documents, surface inconsistent witness statements**, and more, run at project scale.

04

EMBEDDED

WORD + OUTLOOK

Eudia lives inside Word and Outlook, drafting, editing, and reviewing in the document you're already in, with your projects and research one prompt away. No swivel chair.

Draft

From scratch with a reference document, or research first, then draft from the answer.

Fill forms

Open a template, upload a source document, and prompt to populate the form.

Edit

Highlight a section and prompt to update, or resolve every comment in the doc at once.

Bluebook

Agents that can legal cite check and Bluebook before it leaves your desk.
