Federal Enterprise AI Orchestration

Model-agnostic, zero-trust AI orchestration for federal health • SDVOSB-Certified • 18 yrs VHA delivery

AXIS

PRIME FEDERAL SOLUTIONS

WHAT IT IS

AXIS sits between users and frontier AI providers such as OpenAI, Anthropic, Google, Meta, and AWS. It routes each task to the best authorized model, and adds the security, governance, and audit controls no single AI lab provides on its own.

THE PROBLEMS IT SOLVES

⚠️ Locked into one AI vendor	→	✓ **Multiple FedRAMP sources, routed automatically**
⚠️ AI vendor disruption stops operations	→	✓ **Hot-swap with tested, production-ready model alternatives**
⚠️ Fragmented, siloed AI tools	→	✓ **One governed platform**
⚠️ PHI and PII risk on non-FedRAMP models	→	✓ **Routes only to authorized, secure models**
⚠️ No audit trail across AI use	→	✓ **Unified, append-only, verifiable audit log**
⚠️ Unmanaged shadow AI use	→	✓ **Zero-trust controls on every action**
⚠️ High cost as better models emerge	→	✓ **Dynamic model routing**
⚠️ Non-technical staff cannot build AI workflows	→	✓ **Flow, the no-code workflow builder**
⚠️ No protection against AI threats	→	✓ **Secure-by-Default Gateway**
⚠️ No security policy enforcement	→	✓ **Built-in threat detection, review and policy updating**
