Reliable networks, protected end to end.

Wi-Fi, firewalls and cybersecurity for homes, offices and residential properties.

Connect · Link it together

WHO WE ARE

Tera Systems is a technology services company based in Norwalk, Connecticut. We support homes, businesses and property owners on site and remotely: one team for every place your technology lives, from the devices on your desk to your network, your buildings, your software and the parts you make.

THE CHALLENGE

- Slow or patchy Wi-Fi hurts productivity and resident satisfaction.
- Networks grew piece by piece and no one knows how they are set up.
- Security threats target small businesses that lack protection.
- Properties need building-wide connectivity that stays up.

OUR SOLUTION

01 Wi-Fi design and setup
Coverage where people actually work and live.

02 Firewalls and network security
Protection at the edge of your network, configured properly.

03 Cybersecurity
Practical security measures sized for your organization.

04 Property networks
A stable retainer for the leasing office plus a per-door rate for building-wide infrastructure.

HOW WE WORK

1

Free discovery call

A 30-minute conversation to understand your situation and goals. No cost, no obligation.

2

Plan and quote

A clear plan with the right service for your need. Fixed-price services can be booked online straight away.

3

Fix, connect or build

Our team delivers remotely or on site, then stays with you through the client portal.

HOW THIS SERVICE WORKS

We assess what you have, recommend the right setup, then install and support it. Property technology is offered in tiers sized to the number of units.

WHO IT'S FOR

- Offices and small businesses
- Residential property owners and managers
- Homes with demanding Wi-Fi needs

WHY TERA SYSTEMS

One business day

We reach out within one business day.
