From idea to physical part, fast.

Industrial-grade prototypes and production parts, with an instant estimate on our website.

Build · Create what's next

WHO WE ARE

Tera Systems is a technology services company based in Norwalk, Connecticut. We support homes, businesses and property owners on site and remotely: one team for every place your technology lives, from the devices on your desk to your network, your buildings, your software and the parts you make.

THE CHALLENGE

- Prototypes take too long and cost too much from traditional suppliers.
- Small production runs are hard to source.
- Designs need refinement before they can be printed.

OUR SOLUTION

01 Prototyping
Test form and fit quickly before committing to tooling.

02 Production parts
Durable parts in materials such as PLA, PETG and nylon.

03 Design support
Help preparing and refining files for printing.

04 Fast turnaround
Typical lead time of 3 to 5 days.

THE TERA SYSTEMS PLATFORM

Support Keep it working
- Home Tech
- Managed IT

Connect Link it together

HOW WE WORK

1

Free discovery call

A 30-minute conversation to understand your situation and goals. No cost, no obligation.

2

Plan and quote

A clear plan with the right service for your need. Fixed-price services can be booked online straight away.

3

Fix, connect or build

Our team delivers remotely or on site, then stays with you through the client portal.

HOW THIS SERVICE WORKS

Get an instant estimate with the calculator on terasystems.io (priced by material weight and print time), then order online or request a quote for larger jobs.

WHO IT'S FOR

- Product designers and inventors
- Engineers and makers
- Small manufacturers
- Schools and researchers

WHY TERA SYSTEMS
