Software and data built around how you work.

Custom applications, integrations and data workflows built around your existing systems.

Build · Create what's next

WHO WE ARE

Tera Systems is a technology services company based in Norwalk, Connecticut. We support homes, businesses and property owners on site and remotely: one team for every place your technology lives, from the devices on your desk to your network, your buildings, your software and the parts you make.

THE CHALLENGE

- Off-the-shelf tools do not fit the way the business works.
- Systems do not share data, so people re-type it by hand.
- Reports take days to assemble from scattered sources.

OUR SOLUTION

01 Custom applications
Apps designed for your process and your users.

02 Integrations and APIs
Your systems connected so data flows automatically.

03 Data pipelines
Data collected, cleaned and delivered where it is needed.

04 Ongoing management
Optional support after launch, priced separately.

THE TERA SYSTEMS PLATFORM

Support Keep it working
- Home Tech
- Managed IT

Connect Link it together
- Networks & Security
- IoT & Smart Properties
- Hydrogen IoT Deployment

- 3D Printing
- Bio Systems

HOW WE WORK

1

Free discovery call

A 30-minute conversation to understand your situation and goals. No cost, no obligation.

2

Plan and quote

A clear plan with the right service for your need. Fixed-price services can be booked online straight away.

3

Fix, connect or build

Our team delivers remotely or on site, then stays with you through the client portal.

HOW THIS SERVICE WORKS

Every project is scoped before development, so you know what will be built and why. We start with a discovery call and a written scope.

WHO IT'S FOR

- Growing businesses
- Operations-heavy teams
- Organizations with disconnected systems

WHY TERA SYSTEMS

One business day

We reach out within one business day.

Client portal

Tickets, billing and payment history in one place at portal.terasystems.io.

Remote or on site

Work is delivered remotely or in person, depending on the job.
