One view of your hydrogen operations.

Connected monitoring that brings hydrogen production, storage, distribution, mobility and fuel-cell data into a single view.

Connect · Link it together

WHO WE ARE

Tera Systems is a technology services company based in Norwalk, Connecticut. We support homes, businesses and property owners on site and remotely: one team for every place your technology lives, from the devices on your desk to your network, your buildings, your software and the parts you make.

THE CHALLENGE

- Hydrogen equipment data sits in separate systems and screens.
- Teams lack real-time visibility across sites and processes.
- Pilots stall without a clear path from data to decisions.

OUR SOLUTION

01 Site assessment
We review your site, equipment and connectivity.

02 Equipment integration
Priority equipment is connected first.

03 Pilot monitoring and alerts
Live monitoring and alerts proven on a real process.

04 Dashboard and plan
We hand over a dashboard and a plan for the next stage.

THE TERA SYSTEMS PLATFORM

Support Keep it working
- Home Tech
- Managed IT

- Bio Systems

HOW WE WORK

1

Free discovery call

A 30-minute conversation to understand your situation and goals. No cost, no obligation.

2

Plan and quote

A clear plan with the right service for your need. Fixed-price services can be booked online straight away.

3

Fix, connect or build

Our team delivers remotely or on site, then stays with you through the client portal.

HOW THIS SERVICE WORKS

Start with one site or process. Pricing depends on sites, equipment, connectivity, integrations and support, and is confirmed for the agreed scope.

WHO IT'S FOR

- Hydrogen producers and distributors
- Mobility and fuel-cell operators
- Energy and industrial teams

WHY TERA SYSTEMS

One business day

We reach out within one business day.

Client portal

Tickets, billing and payment history in one place at portal.terasystems.io.
