YOUR DATA. INDEPENDENT. READY FOR WHAT'S NEXT.

Preserve, access and activate your enterprise data -
beyond the lifecycle of any application.

YOUR DATA. **INDEPENDENT.** READY FOR WHAT'S NEXT.

Preserve, access and activate your enterprise data - beyond the lifecycle of any application.

ANY ENTERPRISE DATA
ANY SOURCE. ANY ERA.

YOUR DATA. YOUR CONTROL.

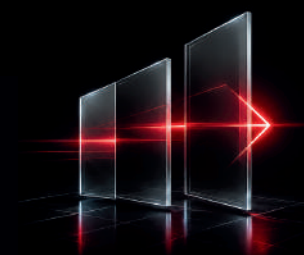

FROM SYSTEM-BOUND TO BUSINESS-READY.

WHY JiVS

Enterprise data should outlive the application that created it.

JiVS separates business data from source applications while preserving its context, governance and accessibility — creating trusted, independent data ready for transformation, compliance and AI.

WHAT JiVS ENABLES

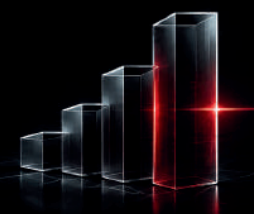

TRANSFORM

Modernize without carrying unnecessary legacy complexity.

GOVERN

Control enterprise information throughout its lifecycle.

ACTIVATE

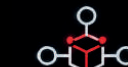

Put trusted enterprise data and business context to work.

THE JiVS DIFFERENCE

DATA INDEPENDENCE

Decouple data from application lifecycles.

BUSINESS CONTEXT

Preserve objects, relationships and meaning.

SAP & NON-SAP

One foundation across heterogeneous landscapes.

GOVERNANCE

Control access, retention and compliance.

DATA SOVEREIGNTY

Maintain independent control of enterprise data.

AI READINESS

Make trusted enterprise context available for AI.

PROVEN BUSINESS VALUE

UP TO
80%

Lower legacy IT operating costs

UP TO
90%

Less data to migrate

100%

Continued audit-ready historical access

3,000+

Successful implementations worldwide

30+

& ARCHIVING

DECOMMISSION/ARCHIVE LEGACY SYSTEMS.

KEEP YOUR DATA AND BUSINESS CONTEXT.

jivs

THE CHALLENGE

Your legacy applications shouldn't stay alive just to access their data.

Organizations keep outdated SAP and non-SAP applications running because historical information must remain available.

High infrastructure
and license costs

Security and
compliance risks

Unnecessary
complexity and
specialist resources

The application may be obsolete. The information isn't.

THE Jivs SOLUTION

Retire the application - without losing the information.

Jivs preserves historical data and business context independently of the source application — enabling legacy systems to be safely decommissioned while information remains governed and accessible.

BUSINESS IMPACT

UP TO **80%**

Lower legacy operating costs

100%

Continued historical access

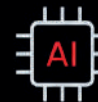

**SAP &
NON-SAP**

Retire heterogeneous applications

**COMPLIANT
RETENTION**

Govern retention and deletion

**AI-READY

02

SAP
RETIREMENT &
INTEGRATION

RETIRE SAP. KEEP THE HISTORY CONNECTED.

THE CHALLENGE

Your ECC system shouldn't stay alive just to access its history.

High infrastructure and license

Security and compliance risks

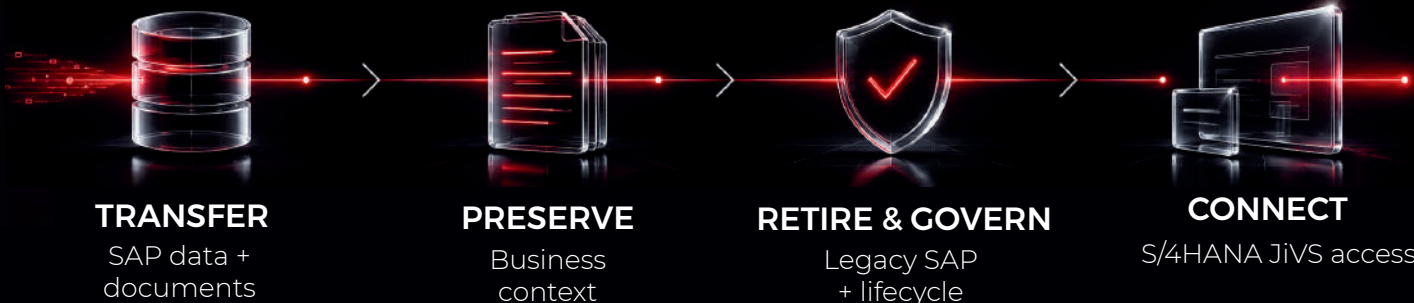

Unnecessary complexity and specialist resources

The system may be legacy, The data is not.

THE Jivs SOLUTION

Retire ECC - without disconnecting users from the past.

Jivs preserves historical SAP data, documents and business context independently of the legacy system - while keeping the information accessible from SAP S/4HANA or Jivs.

03

MERGERS,
ACQUISITIONS
& CARVE-OUTS

SEPARATE THE BUSINESS. NOT THE VALUE.

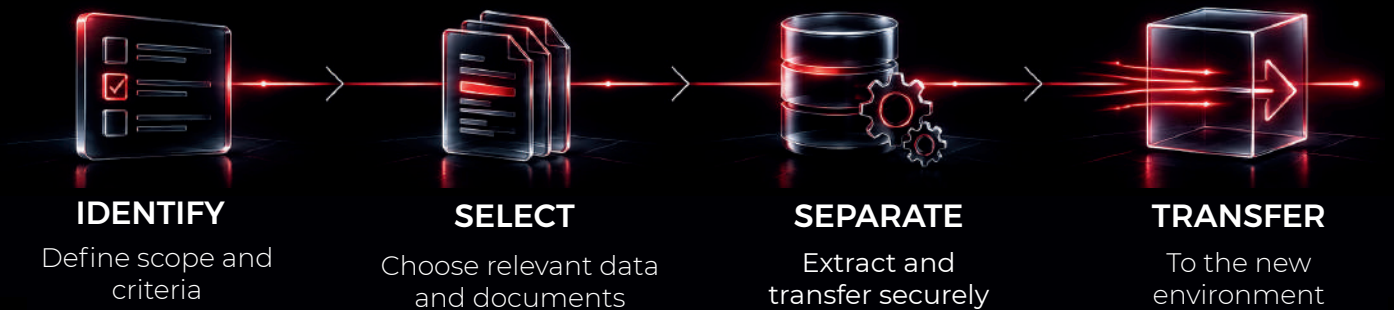

THE CHALLENGE

Mergers, acquisitions and divestitures create complex data challenges across SAP, non-SAP and custom applications.

- Tight timelines and TSA requirements
- Protect sensitive information and IP
- Identify exactly the data that belongs to the transaction

THE JivS SOLUTION

Separate, transfer and integrate enterprise data precisely and securely. JivS IMP enables you to select data and documents based on organizational structures and business criteria - while preserving business context and governing historical data throughout its lifecycle.

BUSINESS IMPACT

- FASTER SEPARATION**
Accelerate carve-out and data handovers
- PRECISE DATA CONTROL**
Transfer only what belongs to the transaction
- IP PROTECTION**
Keep sensitive and non-transaction data protected
- COMPLIANCE**
Governed, traceable and audit-ready
- BUSINESS CONTINUITY**
Preserve historical data and business context
- DATA SOVEREIGNTY**
Maintain independent control of enterprise data

WHERE JivS CREATES VALUE

CUSTOMER PROOF

CONNECT ALL ENTERPRISE DATA. POWER AI WITH **TRUSTED BUSINESS CONTEXT.**

INDEPENDENT. GOVERNED. READY FOR WHAT ´S NEXT.

THE CHALLENGE

Your AI can only see the data you give it.

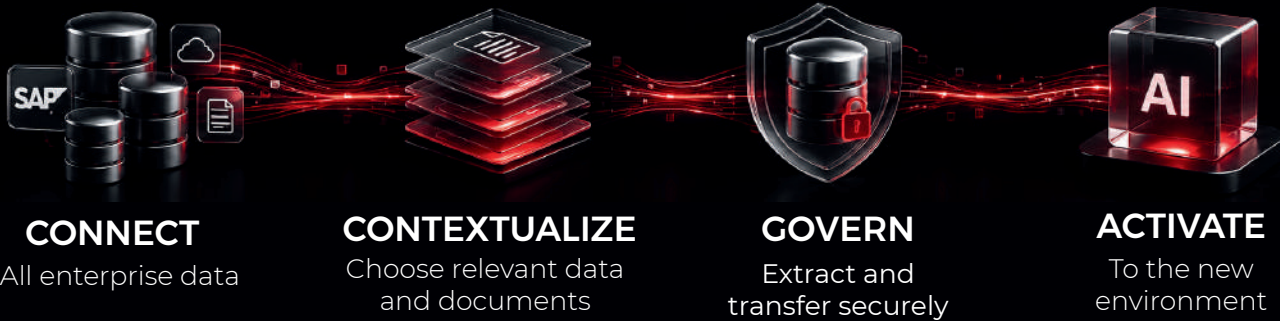

Enterprise data is fragmented across SP, non-SAP, legacy systems and archives - often without consistent structure, governance or business context.

- Fragmented data across systems
- Inconsistent governance and compliance
- Limited AI use cases and slow adoption
- High cost of legacy systems

THE Jivs SOLUTION

One governed data foundation. Enterprise context for AI.

Jivs IMP connects, contextualizes and governs your enterprise data across SAP and non-SAP environments and preserves its business context - ready to activate for AI, analytics and new applications.

BUSINESS IMPACT

- COMPLETE BUSINESS CONTEXT**: Give AI more than isolated records
- ONE GOVERNED DATA LAYER**: Connect historical data for AI and analytics
- AI-READY ACCESS**: Activate data across AI ecosystems
- LOWER LEGACY DEPENDENCY**: Unlock value without keeping old systems
- TRUSTED & COMPLIANT**: Govern access, retention and auditability

WHERE Jivs CREATES VALUE

- AI / GenAI initiatives
- SAP transformation
- AI Agents & CoPilots
- Data silos
- Legacy data for AI
- AI governance

05

DATA
REPLICATION
SERVICE

REPLICATE AHEAD. STAY IN SYNC.

Keep the enterprise data you need continuously available — where and when you need it.

jivs

THE CHALLENGE

Critical data shouldn't move only when the clock starts ticking.

Large data volumes, regulatory requirements and distributed landscapes can turn data transfer into a bottleneck at exactly the wrong moment.

MIGRATION WINDOWS

Large transfers increase cutover pressure

DATA RESIDENCY

Required data must remain locally available

DATA DEPENDENCY

Critical data remains tied to source systems

THE Jivs SOLUTION

Replicate the right data. Keep it continuously synchronized.

Jivs DRS replicates selected enterprise data according to defined business objects, filters and timing rules - keeping the required information available in Jivs independently of the source environment.

SELECT

Business objects + filters

REPLICATE

Continuous / scheduled

SYNCHRONIZE

Keep data current

ACTIVATE

Migration + local use

BUSINESS IMPACT

LESS DOWNTIME

Reduce data left to transfer at cutover

CURRENT DATA

Keep replicated data synchronized

LOCAL COMPLIANCE

Make required data available locally

DATA INDEPENDENCE

Reduce dependency on source platforms

FASTER TRANSFORMATION

Prepare data before the critical window

WHERE Jivs CREATES VALUE

S/4HANA MIGRATION

Reduce cutover data

DATA RESIDENCY

Keep required data local

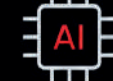

GLOBAL OPERATIONS

Replicate by location

DYNAMIC HISTORIZATION

Continuously offload data

AI & ANALYTICS

Provide current data

CARVE-OUTS

Replicate selected scope
