SERVICES

STRATEGY TO SUPPORT

Modernize your enterprise. Put AI to work.

Strategy, SAP, data and AI, connected. From the first decision to 24/7 support, Celeriti is one partner for the whole journey.

7 services
from strategy to 24/7 support

20+ years
of SAP transformation

ECC to S/4HANA
implement, upgrade, migrate

AI built in
designed into the architecture

SEVEN SERVICES Everything it takes to run an AI-ready SAP enterprise.

01 Business & AI consulting

An SAP and AI roadmap for the decade ahead.

- Cloud ERP strategy and business case
- Fit-to-standard process design
- AI use-case priorities and responsible AI

SAP Signavio · SAP LeanIX

02 · FLAGSHIP Enterprise AI for SAP

AI working inside your business processes.

- AI agents for close, collections and buying
- Document AI and predictive analytics
- AI governance, security and oversight

SAP Business AI · Joule · Agentic AI

03 SAP migration & transformation

Off ECC, onto a clean core built for AI.

- Readiness and custom code analysis
- Greenfield, brownfield or selective
- Data migration and retirement with JiVS

SAP Cloud ERP · S/4HANA · JiVS

04 Data, analytics & reporting

One trusted data foundation for AI.

- Data fabric on SAP Business Data Cloud
- Zero-copy with Snowflake, Databricks
- Planning, dashboards, data governance

SAP Datasphere · SAP Analytics Cloud

05 Integration & automation

People, systems, data and agents, connected.

- API and event-driven integration
- Governed AI access to SAP data
- Document AI for invoices and forms

SAP Integration Suite · SAP Build

06 Cloud & managed hosting

Secure, sovereign, AI-ready operations.

- Move, modernize or retire analysis
- Landing zones, identity, security
- 24/7 operations, FinOps, monitoring

Azure · Google Cloud · AWS

07 Application management

SAP running well, better every quarter.

- AMS across S/4HANA, SuccessFactors, Ariba
- AI-assisted, proactive support
- Quarterly innovation adoption

SAP Cloud ALM · SAP Fiori

ONE PARTNER How we engage

1. **Assess** — What is ready, what is at risk
2. **Architect** — Target ERP, data and AI
3. **Deliver** — Build, integrate, migrate
4. **Run** — Govern, support, improve

One partner from AI decision to running system.

Start with a readiness conversation. We will tell you where to begin, and what can wait.
