IXOPAY

Unlocking AI Payment Intelligence

At IXOPAY, payment success goes beyond high-level analysis. It's about mastering observability and data intelligence. Say goodbye to fragmented data, multiple portals, and exhausting data analysis.

IXOPAY

Clarity for Your Payment Data

Challenges in Payment Data Management

- Fragmented Data: Siloed payment data across multiple gateways and systems.
- Operational Inefficiencies: Manual processes for reconciliation and reporting.
- Limited Insight: Difficulty extracting meaningful insights from complex data.
- Revenue Loss: Missed opportunities for optimization and cost reduction.

A No-Code Payment Intelligence Platform

IXOPAY unifies your payment data, provides instant insights, and delivers AI-driven recommendations to optimize your payment strategy.

Key Features

No-Code Dashboards:
Connect to all your payment sources with ease & access the data in unified dashboard.

Alerts & Anomaly Detection:
Leverage machine learning models to spot anomalies, or configure your alerts for deep transaction monitoring.

AI For Payments:
Receive intelligent suggestions to improve payment performance & reduce costs.

Reconciliation & Cost Allocation:
Streamline your financial operations & gain accurate cost insights.
