The interior life of the child is the real curriculum. Most schools have no daily way to know it.

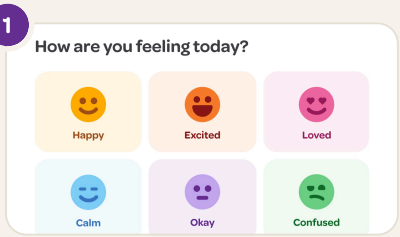

Students take under a minute each day to say how they feel. YouHue helps teachers make sense of those everyday moments and find practical ways to support each child.

Known, not watched

Knowing starts with invitation. Students choose what to share, in their own words, with the adults around them.

HOW IT WORKS

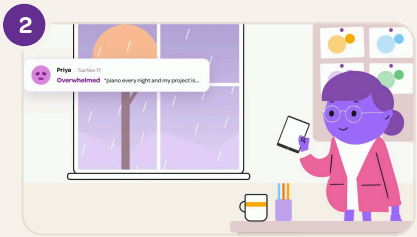

1

Every child checks in

Students choose how they feel and can add their own words, in under a minute.

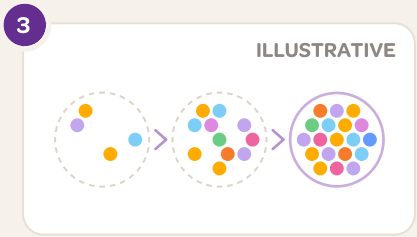

2

Start with who might need you today

The teacher opens to students who might need a closer look, not a blank screen.

3

Let the picture build

Day by day, check-ins build a picture of each child over the months.

WHY YOUHUE IS DIFFERENT

Daily, not periodic. The picture stays current.

Proactive, not passive. The AI underneath supports teacher judgement and never replaces it. The teacher decides.

Universal and everyday, with safety as a floor. Most check-ins are positive or neutral. Safety alerts go to the school's designated staff, who decide what to do.

"Quieter children have shared things I would never have known."

Karl McGrath,
Year 6, Benton Park Primary

Over the years, more than 100 schools in more than 10 countries have used YouHue.

Built around trust

YouHue collects only what it needs. No ads. We never sell student data. YouHue follows COPPA, FERPA and GDPR.

Privacy and data questions answered in writing:
