LOW CLINICAL VALUE MEDICATION PROGRAM: GET THE RIGHT MEDICINE AT THE RIGHT COST

The Low Clinical Value medication program prevents unnecessary spending on high-cost medications that have low clinical value compared to alternatives available in the market. This program provides you with equal or more effective medications at a much lower cost.

If you are prescribed a drug identified by your prescription benefit plan as a low clinical value medication, the plan will not cover the claim. You can work with your pharmacist and prescriber to identify appropriate alternatives, which may be an over-the-counter medication or a different prescription medication.

HIGH-DOLLAR CLAIM REVIEW: GUARDING YOU AGAINST HIGH-COST PRESCRIPTIONS

High-Dollar Claim Review (HDCR) provides umbrella protection to guard against inappropriate use of high-cost medications. If a medication reaches the threshold dollar amount, there is a review of the prescription to protect against inappropriate medicine use, misuse, errors, or fraud.

If you are prescribed a medication that triggers a High-Dollar Claim Review, (a medication that reaches the threshold of \$1,000 or more for less than a 34-day supply or \$3,000 or more for a 35-day or greater supply), it will be initially denied at the pharmacy counter. You will then need to follow the steps listed below.

HDCR Review

1

Call your doctor

Let them know your medication needs a prior authorization. Your doctor will need to file paperwork for your prescription.

2

Your doctor may start the prior authorization:

Your doctor can submit the information to start the prior authorization process. Your prior authorization will then be approved or denied based on the information that is submitted. You will be notified by mail of the decision.

After your doctor properly completes step 2:

Typical reviews take 24-72 hours.

OR

3

You may switch medications:

Your doctor may decide to switch your medication to one that does not require a prior authorization.
