

BRAND VS GENERIC

SAVE MONEY ON PRESCRIPTIONS

USE GENERIC DRUGS

Generic drugs can be as much as 80-85% less expensive than name-brand counterparts. But did you know the FDA requires generics to have the same active ingredients as their name-brand counterparts? Ask your pharmacist about less expensive generic options.

Helpful hint: You can check the manufacturer of your prescription drugs for coupons, rebates, lower cost prescriptions, etc.

QUESTIONS?

If you have questions about your pharmacy benefit contact RxBenefits Member Services at **800.334.8134** or customercare@RxBenefits.com

GOODRX: FREE PRESCRIPTION SAVINGS PROGRAM

GoodRx allows you to compare prescription drug prices at more than 6,000 pharmacies across America, saving up to 80% off many popular prescription drugs. These discounts work for every member of your family.

On the Web:

Instantly look up current drug prices at CVS, Walgreens, Walmart, Costco, and other local pharmacies.

- Huge savings on prescriptions not covered by your insurance
- Discounted prices for many generics that may be less than your insurance copayment
- Savings tips, coupons, and helpful information about your prescriptions
- A pharmacy locator with 24-hour pharmacies and other helpful information
- Request a physical savings card you can put in your pocket. To receive a physical card, go to www.goodrx.com/discount-card

On Your Phone:

GoodRx is also available on your iPhone and Android app so you can check drug prices anytime, anywhere!
