MOST POPULAR PRODUCTS

Flat Bottom Pouch

1.

Custom Size

Available in custom sizes, including narrow & tall shapes, square shapes, etc.

2.

Available Options

All kinds of finishes and materials are available.

3.

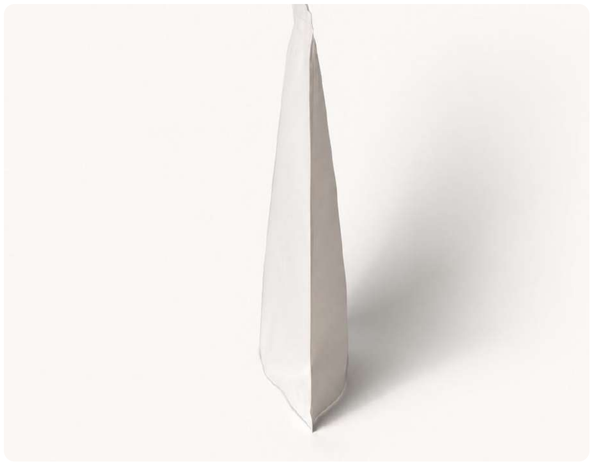

Capacity

Available in sizes from 100g to 3kg.
Suitable for coffee beans, tea, granola, pet food, organic foods, etc.

MOST POPULAR PRODUCTS

Stand Up Pouch

1.

Custom Size

Available in custom sizes, including narrow & tall shapes, wider & shorter shapes, etc.

2.

Available Options

All kinds of finishes and materials are available.
Optional features include a top-opening zipper, tear-off zipper, and hang hole.

3.

Capacity

Available in sizes ranging from small drip coffee pouches to 3kg bags.
Suitable for coffee beans, pet food, seafood, frozen food, nutritional drink, tea, and more.

MOST POPULAR PRODUCTS

Side Gusset Pouch

1.

Custom Size

Available in custom sizes, typically with a tall, narrow profile.

2.

Available Options

Most finishing options are available. The accessory only use tin tie, no zipper. The folded-bottom construction allows the pouch to stand stably and gives it an appearance similar to a flat-bottom pouch.

3.

Capacity

Commonly used for 5 lb bags. The kraft paper/ VMPET/ PE material structure is particularly strong and offers excellent performance in drop tests.

MOST POPULAR PRODUCTS

Three Side Seal Pouch

1.

Custom Size

Available in custom sizes.

2.

Available Options

All kinds of finishes are available,
Optional features include hang holes and top-opening zippers.

3.

Capacity

Commonly used for small-format products such as drip coffee, tea, seeds, and coffee bean samples. Larger sizes are also available to meet specific customer requirements.

MOST POPULAR PRODUCTS

Quad Seal Pouch

1.

Custom Size

Available in custom sizes, typically with a tall, narrow profile.

2.

Available Options

Most finishing options are available. Its four-side-seal construction gives it a structured appearance similar to a flat-bottom pouch while retaining the side-gusset profile. It can be fitted with a tin tie or pull tab zipper.

3.

Capacity

Commonly used for packs of 250g and above. Particularly popular among coffee roasters, it is less commonly used for other food packaging applications.

Standard Materials

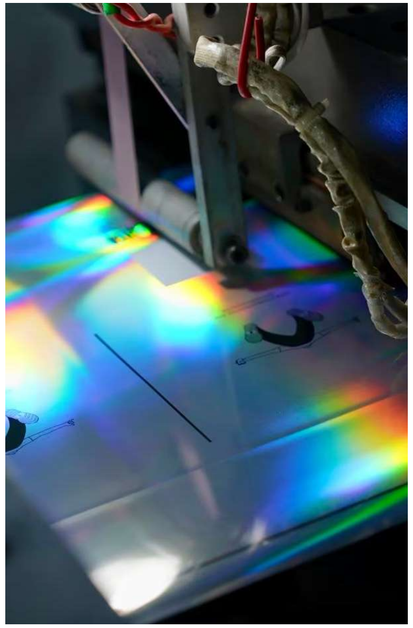

Plastic

A common and cost-effective material offering excellent barrier properties. Available in light-blocking and standard aluminum-based structures.

Kraft Paper

Features a natural paper texture. Suitable for simple designs, while complex designs require a film-coated surface.

Holographic Film

Features a natural rainbow effect created by the material itself rather than printing. Available in metallized and transparent options.

Rice Paper

Features a subtle fibrous texture and a slightly rough feel. Suited for simple designs, more negative space highlights the texture.

Soft Touch OPP

Features a soft, skin-like matte texture with no glossy effect. Offers a smooth, velvety feel with a matte finish.

Sustainable Materials

01/

LDPE 4 | Recyclable

Designed for Recycling | Mono Plastic

Mono-material packaging

A cost-effective mono-material packaging solution made entirely of LDPE, including the zipper and valve. Designed to support recycling through suitable collection and processing systems.

Key Features

- All-PE material structure
- Good barrier performance
- Compatible with various printing and finishing options

Technical Considerations

- Typical shelf life: up to 2 years
- Zippers and valves are made of LDPE to maintain a mono-material structure
- Recycling availability depends on local infrastructure

02/

PCR | Post-Consumer Recycled

Giving Materials a Second Life

Post-Consumer Recycled

Made from materials collected and recycled after consumer use. PCR packaging helps reduce reliance on virgin resources and supports more resource-conscious packaging choices.

Key Features

- Incorporates recycled content
- Can offer a firm, crisp texture with less visible wrinkling than conventional recyclable bags in particular structure
- Helps reduce the use of virgin materials

Technical Considerations

- Recycled content percentage depends on the selected material
- Printing, barrier properties, and accessory compatibility depend on the specific structure

03/

PLA | Compostable

An Alternative to Typical Plastics

Compostable packaging

A compostable packaging option for applications where suitable composting facilities are available. Can be combined with paper-based structures for a natural appearance.

Key Features

- Compostable material options
- Typical plastic-based appearance
- Compatible with selected compostable accessories

Technical Considerations

- Packaging shelf life: 8–10 months
- Store in a cool, dry place
- Divided into industrial and home composting. Home composting results depend on temperature, moisture, and time, etc.

Packaging for a lower-impact future

Our Certifications

Our material options are supported by relevant certifications and standards, including FSC, GRS, BRCGS, ISO 9001 and ISO 14001. Product-specific certificates, test reports and compliance documentation are available upon request.

Committed to long-term sustainability

Choose suitable sustainable materials to help reduce unnecessary material waste and environmental impact on future generations. Our materials R&D center continually monitors developments in sustainable materials and related regulations on your behalf.

Special Finishes & Features

Rough Matte / Sandy Texture

A slightly rough surface with a soft, natural feel.

Embossed

Raised details you can see and feel. Available with printed or blind embossing.

Foil Exposure

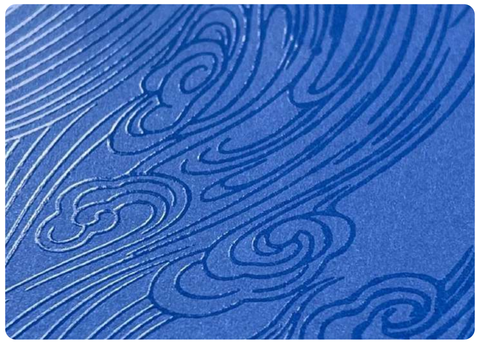

Transparent Ink with Aluminum Foil Lining

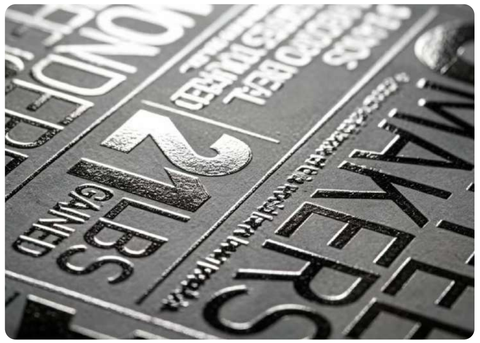

Spot UV

Adds shine and dimension to selected areas, creating a distinctive UV resin-like texture.

Special Finishes & Features

Foil / Hot Stamp

Adds a layer of metallic foil to selected parts of your design.

Spot Gloss

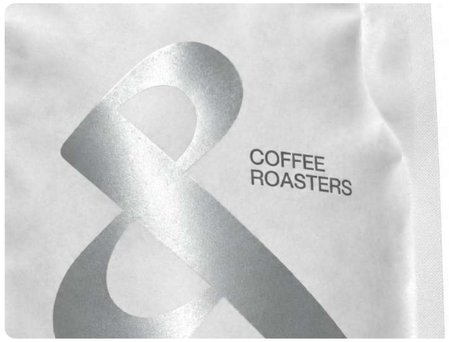

Adds shine to selected areas while the rest stays matte.

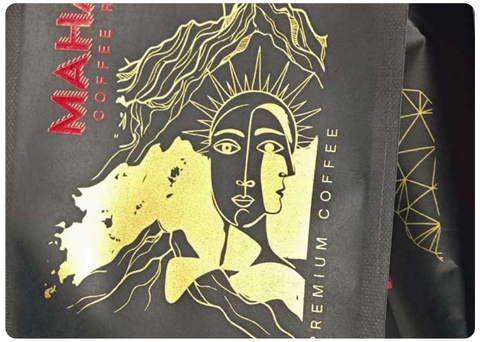

Metallic Ink

Gives printed colors a metallic shine that reflects light.

Holographic Film

Creates a rainbow-like effect that changes as the packaging moves.

Clear Window

See what's inside without opening the packaging.

Interior Print

Adds colors, patterns, or messages inside your packaging.

Card Slot

A small slot that holds a card securely on your packaging.

01/

Opening & Resealing

Functional Features

Pull Tab Zipper

A concealed resealable zipper designed for more convenient opening after the tear-off section is removed.

Standard Zipper / Tear Notch

A resealable zipper helps maintain freshness and provides convenient access to the contents.

Laser Scoring

A scored line between tear notches allows the pouch to open more easily and cleanly.

Tin Tie

A foldable closure that allows the pouch to be resealed after opening.

Hang Hole

Designed to hang the product on the retail display.

Roast Calendar Marking

Area for marking the roasting date, making it easier to assess freshness and plan when to rest and brew the beans.

Rounded Corners

Smooth, rounded edges for a flowing appearance and more comfortable handling.

How We Collaborate

Inquiry & Quote

Whether you have a rough idea or artwork ready to go, you can share it with us through our Contact page. Our team will provide a quote based on your product, order quantity, packaging specifications, and other requirements via an @holdenpak email address.

Sample

Once we understand your needs, we can send you finished packaging samples similar to what you're looking for, so you can see and feel the materials, printing, and overall quality for yourself.

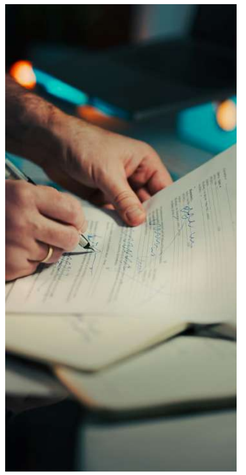

Design

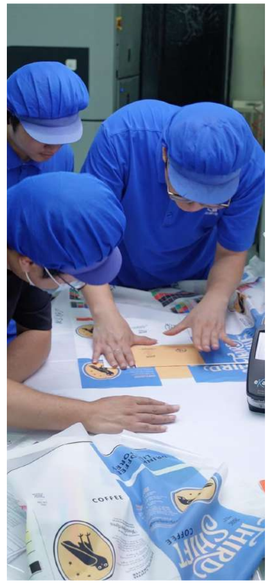

We prepare samples or proofs so you can check the packaging before bulk production. You can review the size, material, print and colour before approval.

Approval

Before production starts, we confirm the final sample and order details with you. Once approved, we can schedule your order for production.

Production

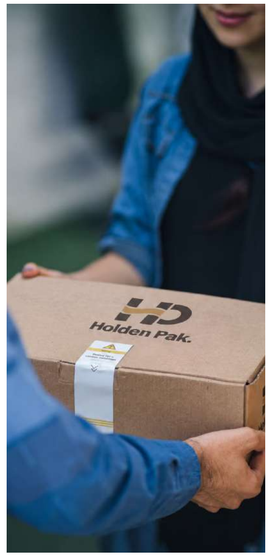

Your order is scheduled and followed by our production team. We track each key stage and keep you updated along the way.

Visit Our Factory

Delivery

Before shipment, we complete the final quality check and prepare the required documents.
We then arrange delivery based on the agreed shipping terms.
