SUB-PROCESSOR LIST

To support the delivery of our services, we use third parties to carry out certain activities and may share customer personal data with them ("Sub-processors"). This document sets out the Sub-processors with whom personal data may be shared, the purposes for which they are used, and the country/region in which the data is hosted.

Before using any Sub-processors, Beacon carries out due diligence to evaluate their security and privacy practices and enters into an agreement to ensure they comply with their legal obligations.

We may update this list from time to time as our Sub-processors change, so please check back frequently for updates.
