Agglutination Viewer / Agglutinoscope

AG GERBER

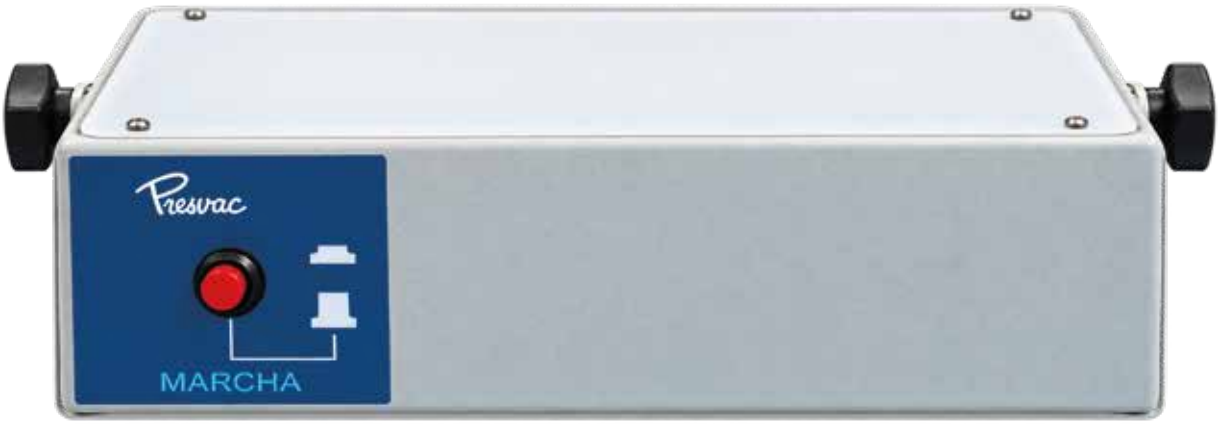

Easy visual assessment of agglutination reactions with an adjustable viewing angle.

The **AG Gerber** is an agglutination viewer designed for visual reading procedures in laboratories and blood banks. Its transparent acrylic plate and adjustable viewing angle allow the operator to adapt the observation position, while its simple design facilitates routine operation and cleaning.

Adjustable viewing angle: Allows the viewing position to be adjusted to suit the operator's workflow.

Transparent surface: Provides direct observation of the working area.

Easy operation: Designed for easy operation and routine cleaning.
