Plasma Extractor

BP – 600

Visual monitoring and adjustable pressure for blood component processing.

The **BP-600** is designed for the plasma expression stage during blood bag processing. Its stainless-steel construction provides durability and resistance for routine use, while the adjustable pressure system allows the operation to be adapted to the procedure. The transparent acrylic panel facilitates visual monitoring of the blood bag during processing.

Adjustable pressure: The adjustable system allows the working pressure to be set according to the procedure.

Visual monitoring: The transparent acrylic panel allows the blood bag to be observed during operation.

Robust construction: Stainless-steel construction suitable for routine use in blood banks.
