

Decapod

Night Vision Head Mount System

ANVIS QR shim

ANVIS permanent shim
(ANVIS or Aeronox available)

Ground NVG mount

Flying with night vision goggles requires a stable head mount. Traditionally, that meant flying in a helmet.

Not anymore. At just 246 grams — including an ANVIS shim and dovetail battery mount — the Decapod by VNE Aero gives pilots and crew a rock-solid NVG platform they can wear with their existing headset. **No helmet required.**

NVG mounting options:

- ANVIS QR shim
- ANVIS permanent shim
- Universal Ground NVG mount

Included:

- ANVIS dovetail and Velcro battery mounts
- Picatinny, Arc Rail and Princeton Tec adapters

Accessory Mounting

Light adapters · Battery mounts

DECAPOD

Night Vision Head Mount System

Each Decapod comes with adapters for Picatinny Rail, Arc Rail and Princeton Tec mounts. Every adapter style has both a right and left side mount. All mounts are included with the base Decapod.

Light Adapters

Accessory point — one on each temple

Picatinny

Arc Rail

Princeton Tec
