Legacy Solutions Can't Secure Modern Enterprises

- Cloud apps vulnerable to data leaks
- Firewalls don't secure web outside corporate network
- Use of passwords & traditional MFA are prone to phishing attacks
- Lack of visibility leaves blind spots for threats

- **SINGLE PANE OF GLASS**
- **SAFETY ONLINE ANYWHERE**

On-premise Apps

Cloud/SaaS Apps

Cloud Servers & Network Devices

Web

Use Cases of Zaperon

SECURE REMOTE ACCESS
Get rid of VPN & connect to on-prem apps (SAP, Custom apps) and SaaS apps securely from everywhere

CONTROL ACCESS FROM BYOD
Prevent access to SaaS apps (M365, HRMS, Salesforce) & servers (RDP/SSH) from unsanctioned devices

PROTECT YOUR SENSITIVE DATA
Block movement of sensitive data from endpoints via email, USB or uploads on other web apps

DISCOVER SHADOW IT
Minimize the risk of unauthorized apps usage across organization and save on license costs

SAFEGUARD AGAINST WEB THREATS
Prevent access to malicious websites and defend against ransomware and malware attacks

MEET REGULATORY COMPLIANCE
Comply to cybersecurity regulations by GDPR, HIPAA, PCI-DSS, SEBI and DPDP Act
