LA NOSTRA AZIENDA

Our company

Guarda il video!
Watch the video!

L'azienda CLEMENTI nasce ufficialmente nel 1975 grazie alla passione del suo fondatore, Clementino Clementi, che in realtà già anni prima aveva progettato e realizzato in un piccolo laboratorio immerso nella campagna fabrianese, alcuni tra i primissimi forni a legna a cottura indiretta d'Italia.
Partendo dalle piccole fiere locali in poco tempo i forni Clementi si sono imposti prima nel mercato nazionale poi in tutto il Mondo, contribuendo a diffondere il Made in Italy e la creatività dell'imprenditoria italiana e marchigiana con prodotti simbolo del nostro territorio e della nostra tradizione.
Grazie anche al contributo fondamentale della moglie Anna e dei due figli Morgan e Diego, la forte passione spinge la squadra Clementi a mettere sempre in primo piano il Cliente e le sue necessità, così l'azienda cresce e si arricchisce di nuove esperienze, tecnologie, idee e brevetti.
Con gli anni viene ampliata la gamma per la cottura con i barbecue, i forni a cottura diretta, i forni professionali ed infine anche nel settore del riscaldamento domestico proponendo prodotti innovativi a legna, a pellet e policombustibili.
La mission di assicurare qualità, funzionalità, comfort e design è sempre più chiara ed anche il claim aziendale conferma questi propositi: tutti i prodotti portano il nome di chi li ha pensati, progettati e creati. Clementino Clementi ci tiene a ricordarlo ogni giorno: "La migliore garanzia per i nostri Clienti è proprio lì, forgiata su ogni singolo prodotto che esce dalla fabbrica: il nostro nome. Noi ci siamo sempre".

Clementi, il re del fuoco dal 1975

The CLEMENTI Company was officially born in 1975, thanks to the passion of the founder Clementino Clementi, who since some years before had designed and built in a small workshop placed in the countryside of Fabriano some of the very first indirect wood-fired ovens in Italy. Starting from the small local fairs in a very short time the Clementi ovens reached the national market and then the whole world, contributing to spread the Made in Italy and the creativity of Italian and Marche entrepreneurship on products that are a symbol of our territory and our tradition. Thanks also to the contribution of his wife Anna and their two sons Morgan and Diego, the Clementi team has developed exclusive know-hows, technologies, ideas and patents always putting the Customer and his needs first. Clementi, specialized in the production of indirect wood-fired ovens, has then expanded its business to barbecues, direct wood-fired ovens and professional wood-fired ovens, then he decided to enter the domestic heating sector by offering innovative wood, pellet and multi-fuel products. Clementi's mission is to ensure great quality, functionality comfort and design in the cooking and heating sector, with the aim of being "the king of fire". All products show the name of the person who designed and created them, Mr Clementino Clementi is keen to remember every day: "The best guarantee for our customers is right there, forged on every single product that leaves our factory, our name. We are always there ".

Clementi, the king of fire since 1975

Metti una sera d’estate, un gruppo d’amici e un forno Clementi.

È questa l’atmosfera perfetta per gustare invitanti grigliate o dell’ottima pizza fatta in casa!

Imagine a summer evening, some friends and a Clementi oven. This is the perfect atmosphere to taste a delicious mixed grill or an excellent homemade pizza!

I NOSTRI PLUS FANNO LA DIFFERENZA

Our plus make the difference

AIR PLUS

Il nostro sistema brevettato AIR PLUS, presente in tutti i modelli Pucinella, Family e Pizza Party a legna, permette di cuocere la pizza perfettamente su entrambi i lati grazie all'immissione di aria comburente sulle braci, per mantenerle sempre vive e ridistribuire la fiamma lungo tutta la volta della camera di cottura.

Our patented AIR PLUS system, available in all models Pucinella, Family and Pizza Party with wood, allows you to cook the pizza perfectly on both sides thanks to the introduction of combustion air from the bottom of the oven on the embers, to keep them alive and redistribute the flame along the roof of the cooking chamber.

MULTICOOKING (accessorio)

Funzione di cottura multipla grazie al nostro nuovissimo optional MULTICOOKING costituito da un braccio estraibile con griglia e teglia raccogli grasso.
Compatibile con le misure 80x60 e 100x80 sia a legna che a gas.

Multiple cooking function thanks to our brand new optional MULTICOOKING consisting of a removable arm with grid and pan to collect fat. Compatible with 80x60 and 100x80 sizes, both wood and gas.

COIBENTAZIONE

Grazie alla massiccia coibentazione e alla qualità dei materiali utilizzati come lo scamotek, i nostri forni sono in grado di mantenere più a lungo il calore. Una volta raggiunta la temperatura desiderata, è possibile utilizzare il forno anche lasciando la bocca di cottura aperta, senza incorrere in rilevanti dispersioni di calore.

Thanks to the massive insulation and the quality of the materials used, like the scamotek, our ovens can keep hot for longer the heat. Once it reaches the desired temperature, it is possible to use the oven also leaving the mouth of the cooking chamber open without incurring significant loss of heat.

SUBITO CALDO

È possibile raggiungere la temperatura di 400°C in 15/20 minuti.

It is possible to reach the temperature of 400°C in 15/20 minutes.

PIÙ PIZZE INSIEME

Capacità di cottura
1 pizza (60x40); 2 pizze (60x60);
