

FSD20

Freestanding Water Dispenser

Healthy Choices for Office Spaces

Features

Advanced Multi-stage Reverse Osmosis Filtration System: It removes silt, suspended solids, rust, organic compounds, heavy metals, bacteria, viruses, and more, ensuring pure water with every sip.

Efficient Cooling Capacity: It has a rapid cooling speed and lower temperature, allowing you to enjoy a refreshing experience.

High Speed Hot Water Production: Faster heating speed, and it can supply hot water at over 1.6 gal/h.

Innovative Dual-UV Technology: With both long-term sterilization protection in the water tank and instant protection for the water outlet, the dispenser provide unparalleled water quality.

Smart Screen Display: Designed for optimal clarity and simplicity, the interface streamlines device status monitoring for effortless user interaction.

Product Parameters

Model

FSD20

Height

54.5"

Width

18.2"

Depth

15.2"

Filter Configuration

PP+CTO+RO

Water temperature

Hot: 195°F

Cold: 40°F

Water Tank Capacity

Ambient: 2.1gal

Hot: 0.5gal

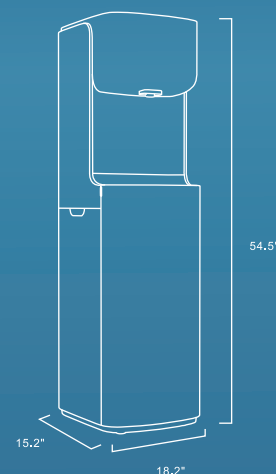

Cold: 1gal

Rated Voltage

110-120v~

Rated Power

Cooling:140W Heating:1500W

Water Options
