Freestanding Water Dispenser

Touchless Water Dispensing, Purity in Every Drop

Features

Advanced Multi-stage Filtration System: It can remove silt, suspended solids, rust, organic compounds, heavy metals, and more to provide unparalleled water quality.

Tri-Temperature Dispensing: One machine offers three options, providing hot, cold, and ambient water for drinking.

UV Sterilization Technology: With long-term sterilization protection in the water tank, the safety of every sip is ensured.

Powerful Cooling System: Equipped with a compressor refrigeration system, it delivers cold water at 40–50°F for a refreshing experience.

Touchfree Water Dispensing: It adopts a safer dispensing approach, ensuring purity in every drop.

Durable Reservoirs: Crafted from 304 stainless steel, a food-grade material, it can provide a high-performance unit for demanding environments.

Product Parameters

Model

FSD10

Height

41.7"

Width

11.8"

Depth

14"

Hot Water

195°F

Cold Water

50°F

Filter Configuration

PP+CTO

Filter Life Cycle

12 months

Water Tank Capacity

Ambient: 0.3gal

Cold: 1.4gal

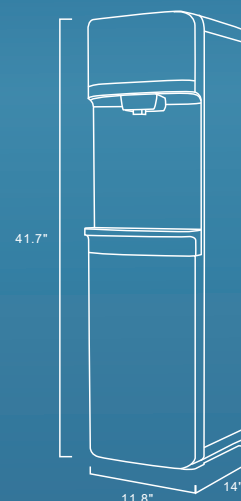

Hot: 0.3gal

Rated Voltage

110-120v~

Rated Power

Cooling: 85W | Heating: 490W

Water Options

Cold

Ambient

Extra Hot
