AVA
POWERED BY ACCLINATE

COMMUNITY INTELLIGENCE PLATFORM

See what traditional clinical trial data misses.

Know what to do next.

Community intelligence that turns ***understanding into action.***

About **AVA**

AVA is Acclinate's community intelligence platform. It transforms signals earned through sustained community engagement into a clear understanding of the trust, beliefs, barriers, needs, and readiness shaping health action.

We connect that intelligence directly to **NOWINCLUDED** activation, so you can not only see the gap, but know exactly where to focus and what to do next.

From Insight to **Action**

Intelligence Dashboard

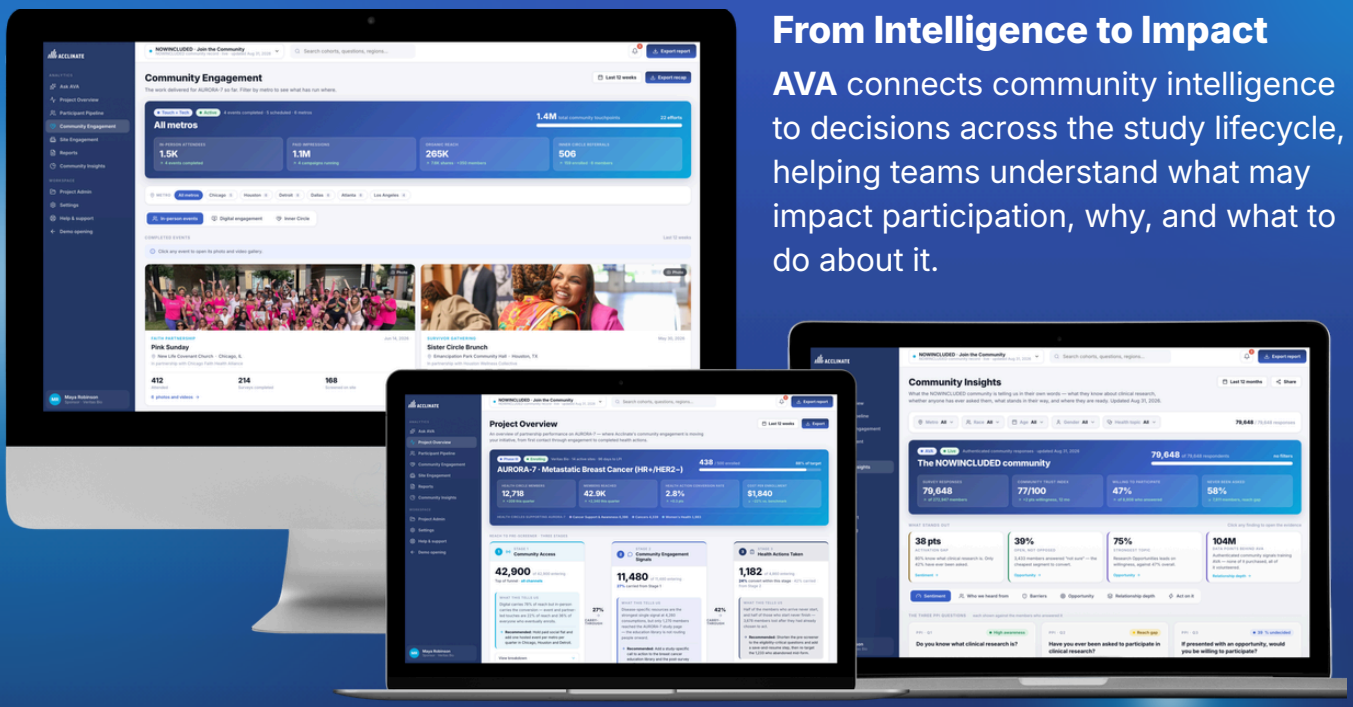

See trust, barriers, readiness, and engagement signals in real time.

Barrier & Readiness Insights

Surfaces exactly what's preventing engagement from becoming action, and where readiness is strongest.

Know What to Do Next

Turn community signals into clear, prioritized actions.

From Intelligence to Impact

AVA connects community intelligence to decisions across the study lifecycle, helping teams understand what may impact participation, why, and what to do about it.

Pre-Launch

Plan with community intelligence from the start.

Identify trust dynamics, participation barriers, community readiness, and geographic opportunity before launch, informing where to focus, how to engage, and what may stand in the way of enrollment.

Post-Launch

Turn live signals into action.

Understand why enrollment is accelerating or stalling, uncover emerging barriers across sites and communities, and translate those signals into targeted actions, while building intelligence that can inform future clinical and commercial strategy.

NOWINCLUDED
POWERED BY ACCLINATE

Activate with us.

Turns intelligence into targeted outreach, trust-building, and engagement, closing the loop from insight to outcome.
